SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a regular submission (extension of a currently approved information collection).

The National Marine Fisheries Service (NMFS) Southeast Region manages the U.S. fisheries in the exclusive economic zone (EEZ) of the South Atlantic, Caribbean, and Gulf of Mexico regions under various Fishery Management Plans (FMPs). The Regional Fishery Management Councils prepared the FMPs pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The regulations implementing the FMPs are located at 50 CFR part 622.

The recordkeeping and reporting requirements in 50 CFR part 622 form the basis for this collection of information. Requirements that fishing gear be marked are essential to facilitate enforcement. The ability to link fishing gear to the vessel owner is crucial to enforcement of regulations issued under the authority of the Magnuson-Stevens Act. The marking of fishing gear is also valuable in actions concerning damage, loss, and civil proceedings. The requirements imposed in the Southeast Region are for coral aquacultured live rock; golden crab traps; mackerel gillnet floats; spiny lobster traps; black sea bass pots; and buoy gear.

II. Method of Collection

The markings will be placed directly on the gear.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a regular submission (extension of a currently approved information collection).

The National Marine Fisheries Service (NMFS) Southeast Region manages the U.S. fisheries in the exclusive economic zone (EEZ) of the South Atlantic, Caribbean, and Gulf of Mexico regions under various Fishery Management Plans (FMPs). The Regional Fishery Management Councils prepared the FMPs pursuant to the Magnuson-Stevens Fishery Conservation and Management Act. The regulations implementing the FMPs are located at 50 CFR part 622.

The recordkeeping and reporting requirements at 50 CFR part 622 form the basis for this collection of information. NMFS Southeast Region requires that all permitted fishing vessels must mark their vessel with the official identification number or some form of identification. A vessel's official number, under most regulations, is required to be displayed on the port and starboard sides of the deckhouse or hull, and weather deck. The official number and color code identifies each vessel and should be visible at distances from the sea and in the air. These markings provide law enforcement personnel with a means to monitor fishing, at-sea processing, and other related activities, to ascertain whether the vessel's observed activities are in accordance with those authorized for that vessel. The identifying number is used by NMFS, the United States Coast Guard (USCG) and other marine agencies in issuing violations, prosecutions, and other enforcement actions. Vessels that qualify for particular fisheries are

readily identified, gear violations are more readily prosecuted, and this allows for more cost-effective enforcement.

II. Method of Collection

Numbers are painted directly on the vessels.
