#### SUPPLEMENTARY INFORMATION:

##### Background

On April 6, 2005, NMFS published a proposed ESA listing determination for the Southern DPS of green sturgeon (70 FR 17386). The proposed rule was based on: information showing that spawning adults are concentrated into one spawning river (i.e., Sacramento River), thus, increasing the risk of extirpation due to catastrophic events; threats that remain severe and have not been adequately addressed by conservation measures currently in place; fishery-independent data exhibiting a negative trend in juvenile green sturgeon abundance; and information showing evidence of lost spawning habitat in the upper Sacramento and Feather Rivers. With the publication of the proposed listing determination, NMFS announced a 90-day public comment period ending on July 5, 2005. On June 20, NMFS announced that it would hold a public hearing (70 FR 35391) on July 6 in Sacramento, CA, and extended the public comment period to July 6 to coincide with the public hearing.

##### Extension of Public Comment Period

NMFS has received a request from a U.S. Department of the Interior to extend the public comment period by 2 weeks. In this notice NMFS is extending the public comment period by three weeks, and now comments will be accepted until July 27, 2005.
