Background: The Good Neighbor Environmental Board meets three times each calendar year at different locations along the U.S.-Mexico border and also holds an annual strategic planning session. It was created by the Enterprise for the Americans Initiative Act of 1992. An Executive Order delegates implementing authority to the Administrator of EPA. The Board is responsible for providing advice to the President and the Congress on environmental and infrastructure issues and needs within the States contiguous to Mexico in order to improve the quality of life of persons residing on the United States side of the border. The

statute calls for the Board to have representatives from U.S. Government agencies; the governments of the States of Arizona, California, New Mexico and Texas; and private organizations with expertise on environmental and infrastructure problems along the southwest border. The U.S. Environmental Protection Agency gives notice of this meeting of the Good Neighbor Environmental Board pursuant to the Federal Advisory Committee Act (Public Law 92-463).

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0387.

Title: On Site Verification of Field Disturbance Sensors—Section 15.201(d).
Form Number: N/A.

Respondents: Business or other for-profit entities.

Needs and Uses: FCC rules permit the operation of field disturbance sensors in the low VHF region of the spectrum. To monitor non-licensed field disturbance sensors operating in the low VHF television bands, a unique procedure for on-site equipment testing of the systems is required to ensure suitable safeguards for the operation of these devices. Data are retained by the holder of the equipment authorized/issued by the FCC and made available only at the request of the Commission.

Needs and Uses: The FCC requires cordless telephone security features protect the public switched telephone network from unintentional line seizure and telephone dialing. These features prevent unauthorized access to the telephone line, the dialing of calls in response to signals other than those from the owner's handset, and the unintentional ringing of a cordless

telephone handset. Use of the cordless telephone security features reduces the harm caused by some cordless telephones to the "911" Emergency Service Telephone System and the telephone network in general.
