

Summary: EPA found the preliminary selected outlet alternative to be environmentally unsatisfactory based on adverse impacts to wetlands and riparian habitats, water quality in the Sheyenne and Red Rivers, introduction of invasive species and concerns about meeting the objectives of the Boundary Waters Treaty of 1909 with Canada. The DEIS also lacked information on water quality impacts and appropriate mitigation.

Summary: EPA endorsed the effort to reduce Southern California's use of Colorado River water to California's legal apportionment of 4.4 maf/yr while minimizing the adverse effects on urban and industrial water use. EPA expressed objections over potential impacts to water and air quality, biological resources, Indian tribes, and potential cumulative impacts on water quality and the increased probability of more frequent and higher magnitude water shortages for other users of Lower Colorado River water. EPA requested that EPA comments on other related water management actions (e.g., the Colorado River Quantification Settlement Agreement (QSA) and the Department of Interior's Implementation Agreement (IA) be considered together with this EIS.
