Abstract: This information collection is necessary to effectively allow farmers and ranchers to nominate potential candidates for the county committee election in accordance with the requirements as authorized by the Soil Conservation and Domestic Allotment Act, as amended. Specifically, FSA uses the information annually or if needed throughout the year for special elections to create ballots for county committee elections. There are no changes to the burden hours since the last OMB approval.

The formulas used to calculate the total burden hours is estimated average time per response (includes travel times). The estimated annual burden per respondent is different from the estimated average time per response because one or more forms are filed more than once a year.

Estimate of Respondent Burden: Public reporting burden for this collection of information is estimated to average 10 minutes per response. The average travel time, which is included in the total burden, is estimated to be 1 hour per respondent.

Respondents: Any individual with farming interest in the Local Administrative Area (LAA) (eligible voters).

Estimated Number of Respondents: 10,000.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 10,000.

Estimated Average Time per Response: 0.067.

Estimated Total Annual Burden on Respondents: 6,700.

We are requesting on all aspects of this information collection to help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether information will have practical utility;

(2) Evaluate the accuracy of FSA's estimate of burden including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility and clarity of the information collected; or

(4) Minimize the burden of the information collection on those who are

to respond through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.
