SUPPLEMENTARY INFORMATION: The Appalachian National Scenic Trail, Delaware Water Gap National Recreation Area, and the Middle Delaware National Scenic and Recreational River are famed for the recreational, scenic, natural, and cultural resources they contain. Each year, Delaware Water Gap National Recreation Area receives more than 5.2 million recreational visitors, and the Delaware River is one of the primary recreational attractions in the park. More than 27 miles of the Appalachian National Scenic Trail occur within the boundaries of Delaware Water Gap National Recreation Area; the Appalachian National Scenic Trail attracts more than 4 million visitors each year.

The existing transmission line right-of-way predates the establishment of the Appalachian National Scenic Trail in 1937, Delaware Water Gap National Recreation Area in 1965, and the Middle Delaware National Scenic and Recreational River in 1978. The applicants, the Pennsylvania Power and Light Electric Utilities Corporation and the Public Service Electric and Gas Company, have expressed a need to construct a 500-kilovolt power line connecting the Susquehanna and Roseland substations. The purpose of the draft environmental impact statement (EIS) is to respond to the applicants' need in light of the purposes and resources of the affected units of the national park system, as expressed in statutes, regulations, and policies.

The National Park Service has developed the draft EIS under section 102(2)(C) of the National Environmental Policy Act of 1969 (Pub. L. 91-190, as amended) and consistent with National Park Service laws, regulations, and policies, and the purpose of these three parks. The draft EIS describes and analyzes six alternatives (1, 2, 2b, 3, 4, and 5) to guide the decision to grant or deny the construction and right-of-way permits requested by the applicants. The applicants have proposed construction of a 500-kilovolt transmission line from the Susquehanna Substation (Berwick, Pennsylvania) to
