SBA will adopt the changes effective with the beginning of the Federal Government's first new fiscal year (October 1, 2012) following the revisions.

Airworthiness Directives; Eurocopter France Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for Eurocopter France Model SA341G helicopters. This AD requires replacing any rotating star with more than 12,000 hours TIS. This AD was prompted by an analysis and tests performed by the manufacturer that indicate that the life limit of the rotating star should be 12,000 hours time-in-service (TIS). The actions of this AD are intended to prevent failure of the rotating star and subsequent loss of control of the helicopter.

DATES: This AD is effective October 19, 2012.

Discussion

On March 29, 2012, at 77 FR 18965, the *Federal Register* published our notice of proposed rulemaking (NPRM), which proposed to amend 14 CFR part 39 to include an AD that would apply to Eurocopter France Model SA341G helicopters, with rotating star, part number (P/N) 341A31.4116.21 installed. That NPRM proposed to require replacing any rotating star with 12,000 or more hours TIS with an airworthy rotating star with less than 12,000 hours TIS. The NPRM also proposed to revise the Airworthiness Limitations section of the Instructions for Continued Airworthiness by reducing the service life of the main rotor rotating star from unlimited hours to 12,000 hours TIS. The proposed requirements were intended to prevent failure of the rotating star and subsequent loss of control of the helicopter.

The Direction Generale de l'Aviation Civile (DGAC), which is the aviation authority for France, has issued DGAC AD No. F-2004-070, dated May 26, 2004, to correct an unsafe condition for Eurocopter France Model SA 341/342 helicopters. The DGAC advises that they issued the AD to require a new service life limit of 12,000 flight hours for the
