Title: Recordkeeping Requirements for Certified Applicators Using 1080 Collars for Livestock Protection.

ICR Status: This is a request to renew an existing approved collection. This ICR is scheduled to expire on May 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost.

Abstract: This ICR affects approximately 40 certified pesticide applicators who utilize 1080 toxic collars for livestock protection. Four states (Montana, New Mexico, South Dakota, and Wyoming) monitor the program, and five pesticide registrants are required to keep records of: (a) Number of collars purchased; (b) number of collars attached on livestock; (c) pasture(s) where collared livestock were placed; (d) number and locations of livestock found with ruptured or punctured collars and the apparent cause of the damage; (e) the dates of each attachment, inspection, and removal; (f) number, dates, and approximate location of all collars lost; (g) locations, and dates of all suspected poisonings of humans, domestic animals or non-target wild animals resulting from collar use location and species data on each animal poisoned as an apparent result of the toxic collar. Applicators maintain records, and the registrants/lead agencies do monitoring studies and submit the reports. These records are monitored by either the: (a) State lead agencies; (b) EPA regional offices; or (c) the registrants. The Environmental Protection Agency (EPA, the Agency) receives annual monitoring reports from registrants or State lead agencies.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 9 hours per response for registrant respondents; 40 hours per response for certified applicator respondents; and 77 hours per response for State agency respondents per response. Burden means the total time, effort, or financial

resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this action are pesticide and other agricultural manufacturers (NAICS 325320), e.g., pesticide registrants whose products include 1080 collars; and government establishments primarily engaged in the administration of environmental quality programs (NAICS 9241), e.g., states implementing a 1080 collar monitoring program.

Estimated Number of Respondents: 49.

Frequency of Response: Annual.

Estimated Total Annual Hour Burden: 1,953 hours.

Estimated Total Annual Labor Cost: \$70,261.

Changes in the Estimates: There is an increase of 200 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's estimate of increased numbers of certified applicators (from 35 certified applicators in 2003 to 40 in the current ICR). This change is an adjustment.

Dated: April 6, 2007.

Acting Director, Collection Strategies
Division.

Title: NESHAP for Mineral Wool Production (Renewal).

ICR Numbers: EPA ICR Number 1799.04, OMB Control Number 2060-0362.

ICR Status: This ICR is scheduled to expire on June 30, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Mineral Wool Production (40 CFR part 63, subpart DDD) were proposed on May 8, 1997, and promulgated on June 1, 1999. Owners/operators of mineral wool production plants are required to install fabric filter bag leak detection systems and then initiate corrective action procedures in the event of an operating problem. Owners/operators subject to NESHAP subpart DDD must also continuously monitor and record: (1) The operating temperature of each thermal incinerator, (2) cupola production (melt) rate; and (3) for each curing oven, the

formaldehyde content of each binder formulation used to manufacture bonded products.

Owners/operators of affected mineral wool production facility must submit initial notifications (where applicable) performance test and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Semiannual reports are also required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NESHAP.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintain reports and records. All reports are sent to the delegated State or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart DDD as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 126 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of

information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Mineral wool production.

Estimated Number of Respondents: 12.

Frequency of Response: Initially, and semiannually.

Estimated Total Annual Hour Burden: 3,018.

Estimated Total Capital and Operations & Maintenance (O&M) Annual Costs: \$9,000, which includes no annualized capital/startup costs and \$9,000 in annual O&M costs.

Changes in the Estimates: There is no change in the labor hours or cost in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden.

Dated: April 9, 2007.
