SUPPLEMENTARY INFORMATION:

I. Abstract

The Ask U.S. Panel ("the Panel") will be a probability-based nationwide nationally representative survey panel for tracking public opinion on a variety of topics of interest to numerous federal agencies and their partners, and for conducting experimentation on alternative question wording and methodological approaches. The Ask U.S. Panel may also be used to collect nationwide rapid-response data to address emerging data needs.

The Panel will be developed through a multi-year effort. The first year of data collection will focus on conducting a large-scale field Pilot Test. Nationally representative data collection based on a probability sample of US adults will begin in the year following the pilot test.

The goal of the Ask U.S. Panel is to ensure availability of frequent data collection for nationwide estimates on a variety of topics and a variety of subgroups of the population, meeting standards for transparent quality

reporting of the Federal Statistical Agencies and the Office of Management and Budget (OMB).

The Panel is an interagency effort, with representatives from Census, the Economic Research Service, the Bureau of Labor Statistics, the National Center for Health Statistics, the National Center for Science and Engineering Statistics, the National Center for Education Statistics, the Department of Defense, Department of Transportation, Department of Labor and the Social Security Administration guiding its design, content and methodological rigor, that will be used to meet data needs across the federal statistical system.

Data will be collected in two distinct phases. In Phase 1, ten percent of the panel (1,700 people) will be recruited and surveyed as a proof-of-concept to refine methods. In Phase 2, the remainder of the panel (17,000 people) will be recruited and surveyed using methodology refined during Phase 1. This package describes both sets of data collection.

II. Method of Collection

Using RTI's address-based frame, a probability sample of addresses in the United States (excluding territories) will be taken with oversamples of specific populations of interest, including households who face food insecurity and households who speak Spanish as a first language. A separate sample of active-duty military members and active-duty military spouses will also be recruited from a frame provided by the Department of Defense. In the pilot, potential panelists will be mailed invitations and asked to participate in an online or inbound telephone screener. If the household qualifies, two members will be randomly sampled and invited to join the panel by completing the baseline questionnaire in the same mode (online or inbound telephone). Households who do not respond to the mailed invitation will be in sample for a face-to-face nonresponse follow up. In these cases, an interviewer would administer the screener and the baseline questionnaire. Participating households who do not have stable internet access will be offered a tablet device with cell service for the duration of the panel to facilitate participation. Panelists will be eligible for online topical surveys no more than once a month once they join the panel for up to 3 years.

These methods may be refined between the pilot and the build-out of the panel.
