SUPPLEMENTARY INFORMATION:

Proposed Project

Safety Program in Perinatal Care (SPPC)-II Demonstration Project

The SPPC-II *Demonstration Project* has the following goals:

- (1) To implement the integrated Alliance for Innovation on Maternal Health (AIM)-SPPC II program in birthing hospitals in Oklahoma and Texas in coordination with AIM and the respective state PQC (Perinatal Quality Collaborative);
- (2) To assess the implementation of the integrated AIM-SPPC II program in these hospitals; and
- (3) To ascertain the short- and medium-term impact of the integrated AIM-SPPC II program on hospital (*i.e.* perinatal unit) teamwork and communication, patient safety, and key maternal health outcomes.

This study is being conducted by AHRQ through its contractor, Johns

Hopkins University (JHU) and the AIM program, JHU’s subcontractor, pursuant to AHRQ’s statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of healthcare services and with respect to quality measurement and improvement. 42 U.S.C. 299a(a)(1) and (2).

Due to continued pandemic-related impacts on the SPPC-II study population, we propose to update the SPPC-II data collection by (1) restructuring and adding questions to the approved qualitative interview guides to be used with AIM program Team Leads and now frontline health providers in the summer/fall of 2021 to include questions to better understand the perceived implementation context; and (2) adding focus group discussions in the summer/fall of 2022 to assess perceptions of implementation and sustainability of the SPPC-II Toolkit at the hospital level. The total burden hours resulting from these proposed updates to the SPPC-II data collection is 64 hours. The total estimated annual burden hours for SPPC-II are 54,693.

Method of Collection

To achieve the goals of this project the following updates to the data collections will be implemented:

(a) Qualitative, semi-structured interviews with AIM Team Leads and frontline staff will be conducted by phone or via zoom in the summer/fall of 2021 to assess the perceived utility of the training and the perceived implementation context (including barriers, facilitators, and strategies) in the context of a reduced scope for SPPC-II. In 8 hospitals, one-hour interviews with AIM Team Leads (1 per hospital) and 30-minute interviews with frontline staff (4 per hospital) will be conducted. An interview guide developed based on the Consolidated Framework for Implementation Research framework will be used to conduct the interviews, together with a corresponding consent form. The interview guide will be supported by the SPPC-II tier level training specific handouts.

(b) Focus group discussions with AIM Team Leads and frontline staff will be conducted by phone or via zoom in the summer/fall of 2022 to assess perceptions of implementation and sustainability of the SPPC-II Toolkit at the hospital level. We will conduct one 1-hour focus groups with AIM Team Leads and frontline staff in each of the 8 hospitals. An interview guide

developed based on the Consolidated Framework for Implementation Research framework will be used to conduct the interviews, together with a corresponding consent form.

Estimated Annual Respondent Burden

Exhibit 1 shows only the estimated annualized burden hours for the

respondents' time to participate in updates to the information collection of the SPPC–II Demonstration Project.

One-hour qualitative interviews will be conducted with a total of 8 AIM Team Leads and 30-minute qualitative interviews with 32 frontline staff in 8 hospitals. We will also conduct 8 one-

hour focus group discussions with a total of 40 AIM Team Leads and frontline staff in the same hospitals.

The total burden hours resulting from the proposed updates to the SPPC–II data collection is 64 hours. The total annual burden hours are estimated to be 54,693 hours.
