

documents referenced in the earlier notice, and extended the comment period for an additional 30 days (68 FR 60885). The public comment period ended on November 24, 2003. The Commission received three comment letters on Utah's alternative groundwater standards proposal (ML032750048, ML032820353, and ML033420067) and one letter with supplements on the Commission's alternative standards determination process (ML032720672, ML032750048, and ML033140034). The NRC staff prepared a letter response dated June 21, 2004 (ML041770014) to the commenter on the Commission's alternative standards determination process.

The NRC staff prepared an analysis of comments for the comments received on Utah's proposed alternative groundwater standards (ML042240488). One commenter did not object to Utah's alternative groundwater regulations; however, the commenter said the discharge permit discussions on implementation is the test of the standards. Another commenter stated that the Utah's proposed alternative groundwater standards were equivalent or more stringent than the NRC and EPA groundwater standards. The third commenter raised concerns with NRC's past implementation of its groundwater standards and wants Utah to implement a more rigorous groundwater protection program. No deficiencies in Utah's proposed alternative groundwater standards were identified by the commenters.

The Commission considered the information provided in SECY-03-025 (ML032901045) which included the State of Utah comparison between Utah's proposed alternative groundwater standards and NRC's standards, and the NRC staff's initial determination that Utah's proposed alternative groundwater standards are equivalent to or more stringent than the NRC groundwater standards. The Commission considered the comments submitted in response to the August 27 and October 24, 2003 **Federal Register** notices and the NRC staff's analysis of the comments, and the NRC staff's recommendation that the Commission approve a final determination that Utah's alternative groundwater standards meet the requirements in section 274o of the Act. On August 4, 2004, the Commission made a determination that Utah's alternative groundwater standards are equivalent to or more stringent than the NRC's groundwater standards for 11e.(2) byproduct material (ML042170320).

November 18, 2004.

The meetings will start at 10 a.m. and will be held in Room 5A06A, Office of Personnel Management Building, 1900 E Street, NW., Washington, DC.

The Federal Prevailing Rate Advisory Committee is composed of a Chair, five representatives from labor unions holding exclusive bargaining rights for Federal blue-collar employees, and five representatives from Federal agencies. Entitlement to membership on the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the Prevailing Rate System and other matters pertinent to establishing prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Office of Personnel Management.

These scheduled meetings will start in open session with both labor and management representatives attending. During the meetings either the labor members or the management members may caucus separately with the Chair to

devise strategy and formulate positions. Therefore, these caucuses will be closed to the public because of a determination made by the Director of the Office of Personnel Management under the provisions of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and 5 U.S.C. 552b(c)(9)(B). These caucuses may, depending on the issues involved, constitute a substantial portion of a meeting.

Annually, the Chair compiles a report of pay issues discussed and concluded recommendations. These reports are available to the public, upon written request to the Committee's Secretary.

The public is invited to submit material in writing to the Chair on Federal Wage System pay matters felt to be deserving of the Committee's attention.
