SUPPLEMENTARY INFORMATION:

I. Abstract

As in previous censuses, the Post-Enumeration Survey (PES) for the 2020 Census will be conducted to provide estimates of census net coverage error and components of census coverage (such as correct enumerations, omissions, and erroneous enumerations, including duplicates) for housing units and people living in housing units (see Definition of Terms) for the United States and Puerto Rico, excluding remote Alaska. These coverage estimates provide insight into the quality and coverage of census results, which can be used to improve future censuses. The primary sampling unit is the Basic Collection Unit (BCU), which is the smallest unit of collection geography for 2020 Census listing operations. As in the past, the PES operations and activities must be conducted separate from and independent of the other 2020 Census operations.

The Independent Listing operation is the first field operation in the PES process. It will be conducted to obtain a complete inventory of all the housing unit addresses within the PES sample of BCUs in the United States (excluding remote Alaska) and in Puerto Rico before the 2020 Census enumeration commences. Group quarters addresses will not be listed as they are out of scope for PES.

During the Independent Listing operation, field staff, referred to as “listers,” will canvass every street, road, or other place where people might live in their assigned BCUs and construct a list of housing units using an automated data collection instrument on a laptop. The laptop will contain the data collection instrument with digital maps of the area that needs to be canvassed. Listers will attempt to contact a member

of each housing unit they encounter on their route. If someone answers, the lister will provide a Confidentiality Notice and ask about the address in order to collect the address information, as appropriate. To ensure all units at an address are properly listed, the lister will then ask if there are any additional vacant or occupied units in the structure or on the property. If there are additional units, the lister will collect and update that information. To be classified as a separate unit, they must meet the housing unit definition requirement of having direct access from outside or through a common hallway, and must either have someone living there or be intended for occupancy, even if vacant at the time of the Independent Listing operation. Mobile homes and trailers, both in a park and not in a park, will also be listed, including any empty lots or pads in the parks in the BCU. Finally, any occupied camper, recreational vehicle, van, boat, tent or other location where people are living during the listing operation will also be listed as a housing unit.

If the lister does not find anyone at home after several attempts, he or she will try to collect the information from a proxy or add any found addresses to the address list by observation as a last resort. Listers will also identify the location of each housing unit by collecting map spots (*i.e.*, Global Positioning System (GPS) coordinates). The lister will also collect information on the status of each housing unit, such as occupied, vacant, under construction, empty trailer park, etc. Completed Independent Listing BCUs will be automatically reviewed for abnormal characteristics (such as GPS information indicating that the lister was far from the units they were listing). BCUs with unusual characteristics may be subject to quality control wherein quality control listers return to the field to check a portion of units to ensure that the work performed meets Census Bureau quality standards.

Following the completion of listing for each BCU, the addresses are computer and clerically matched, on a flow basis, against the list of addresses considered valid for the census. Addresses that remain unmatched or have unresolved address status after matching will be sent to the Initial Housing Unit Followup operation, during which listers collect additional information that might allow a resolution of any differences between the Independent Listing and census address list results. Cases will also be sent to the field to resolve potential duplicates and unresolved housing unit
