

report must be developed by, or in consultation with, the state MCH Health agency.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This estimate includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and

maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

In fiscal year (FY) 2019 and FY 2020, states will submit an application/annual report without the 5-year needs

assessment summary for a total annual estimated burden of 7,080 hours. In FY 2021, states will submit an application/annual report with the 5-year needs assessment summary for a total estimated burden of 11,151 hours. As a result of the proposed revisions, average annual burden is projected to be reduced by approximately 700 hours.

Total Estimated Annualized Burden Hours:

Form name	Number of respondents	Number of responses per respondent	Total responses	Burden per response (in hours)	Total burden hours
Application and Annual Report without 5-Year Needs Assessment Summary	59	1	59	120	7,080
Application and Annual Report with 5-Year Needs Assessment Summary	59	1	59	189	11,151
Average Total Annual Burden	59	59	* 8,437

* Reflects the average of one Application/Annual Report with Needs Assessment Summary and two Application/Annual Reports without Needs Assessment Summary

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Jason E. Bennett,

Director, Division of the Executive Secretariat.
