

Feeder Dam serves as a re-regulating dam to even the flows released from peaking operations upstream at the Sherman Island Development (Hudson River Project, FERC No. 2482). Daily pond fluctuations range from three feet to six feet when the flashboards are in place. Water from the powerhouse is discharged directly into the upper reach of the Glens Falls (FERC No. 2385) and South Glens Falls (FERC No. 5461) reservoir.

m. *Locations of the application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE, Room 2A, Washington, DC 20426, or by calling (202) 208-1371. The application may be viewed on the web at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance). A copy is also available for inspection and reproduction at the address in item h. above.

Filing and Service of Responsive Documents—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to Section 4.34(b) of the Regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice. All reply comments must be filed with the Commission within 105 days from the date of this notice.

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "COMMENTS", "REPLY COMMENTS", "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the

application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. An additional copy must be sent to Director, Division of Environmental Engineering Review, Federal Energy Regulatory Commission, at the above address. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b), and 385.2010.

Linwood A. Watson, Jr.,

Acting Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98-1-000]

Regulations Governing Off-the-Record Communications; Public Notice

July 14, 2000.

This constitutes notice, in accordance with 18 CFR 385.2201(h), of the receipt of exempt and prohibited off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive an exempt or a prohibited off-the-record communication relevant to the merits of a contested on-the-record proceeding, to deliver a copy of the communication, if written, or a summary of the substance of any oral communication, to the Secretary.

Prohibited communications will be included in a public, non-decisional file associated with, but not part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such requests

only when it determines that fairness so requires.

Exempt off-the-record communications will be included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of exempt and prohibited off-the-record communications received in the Office of Secretary within the preceding 14 days. The documents may be viewed on the Internet at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance).

Exempt: None.

Prohibited: None.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[SW-FRL-6838-8]

No-Migration Variance From Land Disposal Restrictions for Exxon Mobil Corporation, Billings, MT South Land Treatment Unit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final decision.

SUMMARY: EPA is reissuing a no-migration variance ("variance") for land disposal of hazardous waste to Exxon Mobil Refining & Supply Company Billings Refinery ("Exxon"), a division of Exxon Mobil Corporation, formerly known as Exxon Company U.S.A. Authority for the decision has been delegated to the EPA Regional Administrator. This variance approved under Resource Conservation and Recovery Act (RCRA) regulations allows Exxon to place certain untreated hazardous wastes subject to the RCRA land disposal restrictions (42 U.S.C. 36901 *et seq.*) at their Billings (Montana) refinery South Land Treatment Unit (SLTU). Exxon submitted a request to EPA on March 24, 1998 for renewal of the no-migration variance in conjunction with their State of Montana hazardous waste permit reissuance. Exxon also petitioned to amend the variance by adding the newly listed hazardous waste, Petroleum Refinery Primary Oil/Water/Solids Separation Sludge (EPA hazardous waste code F037) generated at the Exxon Refinery in Billings, Montana.
