

The agency processes applications by a NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides a final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including DEKRA, which details the NRTL's scope of recognition. These pages are available from the OSHA website at <http://www.osha.gov/dts/otpca/nrtl/index.html>.

DEKRA submitted an application to OSHA for expansion of the NRTL scope

of recognition on January 5, 2023 (OSHA–2019–0009–0013), requesting the addition of six recognized testing standards. OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information. OSHA did not perform an on-site review associated with this application. OSHA staff has preliminarily determined that OSHA should grant the application.

OSHA published a **Federal Register** notice announcing DEKRA's application and soliciting public comment on December 30, 2024 (89 FR 106601). The agency requested comments by January 14, 2025, however no comments were received in response to this notice. OSHA is now proceeding with the expansion of DEKRA's NRTL scope of recognition.

To obtain or review copies of all public documents pertaining to the

DEKRA expansion application, go to www.regulations.gov or contact the Docket Office at (202) 693–2350 (TTY (877) 889–5627. Docket No. OSHA–2019–0009 contains all materials in the record containing DEKRA's recognition.

II. Final Decision and Order

OSHA staff examined DEKRA's expansion application and examined other pertinent information. Based on review of this evidence, OSHA finds that DEKRA meets the requirements of 29 CFR 1910.7 for expansion of recognition, subject to the specified limitations and conditions. OSHA, therefore, is proceeding with this final notice to grant expansion of DEKRA's scope of recognition. OSHA limits the expansion of DEKRA's recognition to testing and certification of products for demonstration of compliance to the test standards listed below in Table 1.

TABLE 1—LIST OF APPROPRIATE TEST STANDARDS FOR INCLUSION IN DEKRA'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
FM 3600	Electrical Equipment for Use in Hazardous (Classified) Locations, General Requirements.
FM 3610 *	Intrinsically Safe Apparatus and Associated Apparatus for Use in Class I, II and III, Division 1 Hazardous (Classified) Locations.
FM 3611	Electrical Equipment for Use in Class I, Division 2; Class II, Division 2; and Class III, Division 1 and 2 Hazardous Locations.
FM 3615 *	Explosion-proof Electrical Equipment, General Requirements.
FM 3810 *	Electrical and Electronic Test, Measuring and Process Control Equipment.
UL 857	Electric Busways and Associated Fittings.

* OSHA notes that the title to this standard in the table is taken from OSHA's List of Appropriate Test Standards (see <https://www.osha.gov/nationally-recognized-testing-laboratory-program/list-standards>). This title is not the same as the title currently used by the Standards Developing Organization that issued the test standard. OSHA intends to update the List of Appropriate Test Standards to reflect the currently used title in the near future.

A. Conditions

In addition to those conditions already required by 29 CFR 1910.7, DEKRA also must abide by the following conditions of the recognition:

1. DEKRA must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its operations as a NRTL, and provide details of the change(s);

2. DEKRA must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and

3. DEKRA must continue to meet the requirements for recognition, including all previously published conditions on DEKRA's scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of DEKRA as a NRTL, subject to the limitations and conditions specified above.

III. Authority and Signature

Douglas L. Parker, Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8–2020 (85 FR 58393, Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC.

Douglas L. Parker,

Assistant Secretary of Labor for Occupational Safety and Health.

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request; Grantee Reporting Requirements for Partnership for Research and Education in Materials (PREM)

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: The National Science Foundation (NSF) is announcing plans to renew this collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, we provide an opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting Office of Management and Budget (OMB) clearance of this collection for no longer than 3 years.

DATES: Written comments on this notice must be received by March 24, 2025 to be assured consideration. Comments received after that date will be considered to an extent practicable. Send comments to address below.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Suite W18200, Alexandria, Virginia 22314; telephone (703) 292–7556; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal

Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including Federal holidays).

SUPPLEMENTARY INFORMATION:

Title of Collection: Grantee Reporting Requirements for Partnerships for Research and Education in Materials (PREM).

OMB Number: 3145–0232.

Expiration Date of Approval: June 30, 2025.

Type of Request: Intent to seek approval to renew information collection.

Overview of this Information Collection: The Partnerships for Research and Education in Materials (PREM) aims to enhance broadening participation of underserved groups in materials research and education by stimulating the development of formal, long-term, collaborative research and education relationships between minority-serving colleges and universities and centers, institutes and facilities supported by the NSF Division of Materials Research (DMR). With this collaborative model PREMs build intellectual and physical infrastructure within and between disciplines, weaving together knowledge creation, knowledge integration, and knowledge transfer. PREMs conduct world-class research through partnerships of academic institutions, national laboratories, industrial organizations, and/or other public/private entities. New knowledge thus created is meaningfully linked to society, with an emphasis on enhancing broadening participation and workforce development.

PREMs enable and foster excellent education, integrate research and education, and create bonds between learning and inquiry so that discovery and creativity more fully support the learning process. PREMs capitalize on broadening participation of underserved communities through participation and collaboration in center activities and demonstrate leadership in the involvement of groups underrepresented in science and engineering.

PREMs will be required to submit annual reports on progress and plans, which will be used as a basis for performance review and determining the level of continued funding. To support this review and the management of the award PREMs will be required to develop a set of management and performance indicators for submission annually to NSF via the Research Performance Project Reporting module in

Research.gov. These indicators are both quantitative and descriptive and may include, for example, the characteristics of personnel and students; sources of financial support and in-kind support; expenditures by operational component; research activities; education activities; patents, licenses; publications; degrees granted to students involved in PREM activities; descriptions of significant advances and other outcomes of the PREM effort.

Each PREM's annual report will include the following categories of activities: (1) research, (2) education (3) outreach, (4) partnerships, (5) pathway for enhancing broadening participation, (6) management, and (7) budget reports.

For each of the categories the report will describe overall objectives for the year, achievements and accomplishments, potential problems the PREM has encountered in making progress towards goals, anticipated problems in the following year, and specific outputs and outcomes.

PREMs are required to file a final report through the RPPR and external technical assistance contractor. Final reports contain similar information and metrics as annual reports but are retrospective.

Use of the Information: NSF will use the information to continue funding of PREMs, and to evaluate the progress of the program.

Estimate of Burden: 70 hours per PREM for 38 PREMs for a total of 2,660 hours.

Respondents: Non-profit institutions.

Estimated Number of Responses per Report: One from each of the fifteen PREMs.

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: January 17, 2025.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–395; NRC–2023–0152]

Dominion Energy South Carolina, Inc.; Virgil C. Summer Nuclear Station, Unit 1; Draft Supplemental Environmental Impact Statement

AGENCY: Nuclear Regulatory Commission.

ACTION: Reschedule of public meeting; reopening of comment period.

SUMMARY: On December 6, 2024, the U.S. Nuclear Regulatory Commission (NRC) solicited public comments on draft Supplement 15, Second Renewal, to the Generic Environmental Impact Statement (GEIS) for License Renewal of Nuclear Plants, NUREG–1437, regarding the subsequent renewal of Renewed Facility Operating License No. NPF–12 for an additional 20 years for Virgil C. Summer Nuclear Station, Unit 1 (V.C. Summer). The public comment period closed on January 21, 2025. The NRC has rescheduled the in-person public meeting to receive comments on the document and is therefore reopening the public comment period to allow more time for members of the public to submit their comments.

DATES: The NRC has rescheduled its in-person public meeting to January 28, 2025, at 6 p.m. eastern time (ET). The public meeting details can be found on the NRC's Public Meeting Schedule at <https://www.nrc.gov/pmns/mtg>. The comment period for the document published on December 6, 2024 (89 FR 97077) has been reopened. Members of the public are invited to submit comments by February 11, 2025. Comments received after this date will be considered, if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before that date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2023–0152. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email:
