SUMMARY: The Fish and Wildlife Service, Southeast Region, intends to gather information necessary to prepare a comprehensive conservation plan and environmental assessment pursuant to the National Environmental Policy Act of 1969 and its implementing regulations. The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997, requires the Service to develop a comprehensive conservation plan for each national wildlife refuge. The purpose in developing a comprehensive conservation plan is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish

and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, plans identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation.

The purpose of this notice is to achieve the following:

- (1) Advise other agencies and the public of our intentions, and
- (2) Obtain suggestions and information on the scope of issues to include in the environmental document.

DATES: To ensure consideration, written comments must be received no later than December 7, 2006.

Located along the Pee Dee River in North Carolina, it comprises 8,443 acres of bottomland hardwoods, mixed-pine hardwoods, upland pines, croplands, old fields, and moist-soil units. Management of the refuge includes cooperative farming that enhances wildlife food and cover, impoundment management for waterfowl and wading birds, timber management, field border and old field management, prescribed burning, deer heard management, and regional partnerships.
