SUPPLEMENTARY INFORMATION:

Title: Certification of Enforcement of the Heavy Vehicle Use Tax.

OMB Control #: 2125-0541.

Background: Title 23 United States Code, Section 141(c), provides that a State's apportionment of funds under 23 U.S.C. 104(b) (5) shall be reduced in an amount up to 25 percent of the amount to be apportioned during any fiscal year beginning after September 30, 1984, if vehicles subject to the Federal heavy vehicle use tax are lawfully registered in the State without having presented proof of payment of the tax. The annual certification by the State Governor or designated official regarding the collection of the heavy vehicle use tax serves as the FHWA's primary means of determining State compliance. The FHWA has determined that an annual certification of compliance by each State is the least obtrusive means of administering the provisions of the legislative mandate. In addition, States are required to retain for 1 year Schedule 1, IRS Form 2290, Heavy Vehicle Use Tax Return (or other suitable alternative provided by regulation). The FHWA conducts compliance reviews at least once every 3 years to determine if the annual certification is adequate to ensure effective administration of 23 U.S.C. 141(c).

Respondents: 50 State Transportation Departments, and the District of Columbia for a total of 51 respondents.

Frequency: Annually.

Estimated Average Annual Burden per Response: The average burden to submit the certification and to retain required records is 12 hours per respondent.

Estimated Total Annual Burden Hours: Total estimated average annual burden is 612 hours.

Electronic Access: Internet users may access all comments received by the U.S. DOT Dockets by using the universal resource locator (URL): <http://dms.dot.gov>, 24 hours each day, 365 days each year. Please follow the instructions online for more information and help.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued on: September 11, 2007.

Title: Preparation and Execution of the Project Agreement and Modifications.

OMB Control Number: 2125-0529 (expiration date September 30, 2007).

Background: Formal agreements between State Transportation Departments and the FHWA are required for Federal-aid highway

projects. Section 1305 of the Transportation Equity Act for the 21st Century (TEA-21, Pub. L. 105-178) amended 23 U.S.C. 106(a) and combined authorization of work and execution of the project agreement for a Federal-aid project into a single action. States continue to have the flexibility to use whatever format is suitable to provide the statutory information required, and burden estimates for this information collection are not changed.

Respondents: There are 56 respondents, including 50 State Transportation Departments, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Territories of Guam, the Virgin Islands and American Samoa.

Frequency: On an on-going basis as project agreements are written.

Estimated Average Annual Burden per Response: There is an average of 476 annual agreements per respondent. Each agreement requires 1 hour to complete.

Estimated Total Annual Burden Hours: 26,656 hours.

FOR FURTHER INFORMATION CONTACT:

Major Project Manager: Ryan Rizzo, 517-702-1833. Environmental Program Manager: David T. Williams, 517-702-1820.

SUPPLEMENTARY INFORMATION: The proposed federal action is to expand the Blue Water Bridge Plaza and improve the I-94/I-69 corridor. Improvements are needed on the Blue Water Bridge Plaza to provide safe, efficient and secure movement of people and goods across the Canadian-U.S. border in the Port Huron area to support the economies of Michigan, Ontario, Canada, and the United States and to support the mobility and security needs associated with national and civil defense.

Purpose and Need for the Project: The selected alternative must provide additional space for inspection booths, offices, docks to inspect and unload cargo, new security measures, and parking for cars and trucks needing inspection. The need for additional space and facilities is supported by several key issues including:

- Security issues.
- Introduction of new inspection technologies, procedures, and policies.
- Limited existing space to accommodate increased number of border inspection agents.
- Traffic conflicts and crash history.
- Access between the plaza and adjacent circulatory local roads.
- Traffic growth and traffic backups.
- Existing infrastructure conditions of the I-94/I-69 corridor.
- Upgrading the International Welcome Center.

Alternatives Evaluated: The DEIS evaluates three action alternatives in addition to a No-Build Alternative: City East Alternative, City West Alternative and the Township Alternative.

1. The No-Build Alternative would not make any changes to the existing plaza configuration or ramps. MDOT and CBP would continue to maintain the existing plaza facilities and new technology and procedures would be introduced on the existing plaza
