### Federal Energy Regulatory Commission

[Project No. 2192-022-WI]

#### Consolidated Water Power Company; Notice of Availability of Final Environmental Assessment

March 20, 2007.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed an application for a transfer of project lands and acquisition of lands at the Biron Project (FERC No. 2192), and has prepared a final environmental assessment (FEA) for the proposal. The proposed transfer of project lands and acquisition of lands would occur on the Biron reservoir in Wood County, Wisconsin.

In the application, Consolidated Water Power (licensee) requests Commission authorization to exchange approximately 3.14 acres of licensee-owned lands with 3,000 linear feet of shoreline along the Biron flowage, for three different parcels of land totaling approximately 205.213 total acres. The first parcel has 830 linear feet of river shoreline and consists of 47.546 acres. The second parcel has 126 linear feet of river shoreline and consists of 2.960 acres, abutting an existing licensee-owned boat launch. The third parcel consists of islands in the river, peninsulas, and a roadside access totaling 154.84 acres (48.82 acres above water). These island perimeters, peninsulas, and the roadside access total 33,749 linear feet of waterfront. All lands are currently within the project boundary, and the licensee intends to retain flowage rights over any conveyed lands, and to retain all lands within the

project boundary. The FEA contains the Commission staff's analysis of the probable environmental impacts of the proposed land conveyances and exchanges.

The FEA is attached to a Commission order titled "Order Amending License to Authorize Land Exchange," which was issued November 17, 2006, and is available for review and reproduction at the Commission's Public Reference Room, located at 888 First St., NE., Room 2A, Washington, DC 20426. The FEA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "elibrary" link. **ICR Numbers:** EPA ICR No. 0282.14, OMB Control No. 2060-0048.

**ICR Status:** This ICR is scheduled to expire on March 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not

The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** Per sections 207(c)(1) and 213 of the Clean Air Act (CAA), when a substantial number of properly maintained and used engines produced by a manufacturer do not conform to emission standards, the manufacturer is required to recall the engines. Manufacturers are also required to submit Defect Information Reports (DIRs) to alert EPA of the existence of emission-related defects on certain classes of engines that may cause the engines' emissions to exceed the standards and ultimately may lead to a recall. EPA uses these reports to target potentially nonconforming classes of engines for future testing, to monitor compliance with applicable regulations and to order a recall, if necessary. Manufacturers can also initiate a recall voluntarily by submitting a Voluntary Emission Recall Report (VERR). VERRs and VERR updates allow EPA to determine whether the manufacturer conducting the recall is acting in accordance with the CAA and to examine and monitor the effectiveness of the recall campaign.

The information is collected by the Heavy-duty and Nonroad Engine Group, Compliance and Innovative Strategies Division, Office of Transportation and Air Quality, Office of Air and Radiation. Confidentiality of proprietary information submitted by manufacturers is granted in accordance with the Freedom of Information Act, EPA regulations at 40 CFR part 2, and class determinations issued by EPA's Office of General Counsel.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 148 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and
