SUPPLEMENTARY INFORMATION: The Atlantic shark fisheries are managed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The 2006 Consolidated HMS FMP is implemented by regulations at 50 CFR part 635.

On May 7, 2008 (73 FR 25665), NMFS published an NOI that summarized the 2007 Small Coastal Shark (SCS) stock assessment conducted for Atlantic sharpnose, blacknose, bonnethead, and finetooth sharks. The NOI also described NMFS's determination of the status of these stocks based on the results of the 2007 stock assessment, including the determination that blacknose sharks are overfished with overfishing occurring. As a result of this determination, NMFS is taking steps to amend current shark management measures via a third FMP amendment to the 2006 Consolidated HMS FMP. On July 2, 2008 (73 FR 37932), NMFS

published a notice that announced the availability of an issues and options scoping presentation describing potential measures for inclusion in Amendment 3 to the 2006 Consolidated HMS FMP and provided details for four scoping meetings to discuss and collect comments on these issues. NMFS anticipates completing this amendment and any related documents by January 1, 2010.

Due to the timing of the Gulf of Mexico Fishery Management Council's meeting at the end of October, NMFS is extending the comment period to provide additional opportunity for the public, the Atlantic Regional Fishery Management Councils, the Atlantic and Gulf States Marine Fisheries Commissions, and other interested parties to comment on potential SCS management measures. These comments will assist NMFS in determining the options for rulemaking to conserve and manage shark resources and fisheries, consistent with the Magnuson-Stevens Act and the 2006 Consolidated HMS FMP.
