The NTP invites the submission of public comments on the draft background document for glass wool fibers. An expert panel will meet on June 9–10, 2009, at the Sheraton Chapel Hill Hotel, One Europa Drive, Chapel Hill, NC 27514 to peer review the draft background document for glass wool fibers and, once completed, make a recommendation regarding the listing status (i.e., known to be a human carcinogen, reasonably anticipated to be a human carcinogen, or not to list) for glass wool fibers or categories of glass wool fibers (that is “certain” glass wool fibers) in the 12th RoC. The RoC expert panel meeting is open to the public with time scheduled for oral public comments. Attendance is limited only by the available meeting room space. Following the expert panel meeting and completion of the expert panel report, the NTP will post the final background document and the expert panel peer review report on the RoC Web site.

SUPPLEMENTARY INFORMATION:

Background

The NTP announced the RoC review process for the 12th RoC on April 16,

2007 in the **Federal Register** (72FR18999 available at <http://ntp.niehs.nih.gov/go/15208>). An expert panel meeting is being convened on June 9–10, 2009, to review glass wool fibers for the 12th RoC. The draft background document for glass wool fibers will be available on the RoC website by April 9, 2009, or in printed text from the RoC Center (see **ADDRESSES** above). Persons can register free-of-charge with the NTP listserv (<http://ntp.niehs.nih.gov/go/231>) to receive notification when draft RoC background documents for candidate substances for the 12th RoC are made available on the RoC Web site.

Glass wool refers to fine glass fibers forming a mass resembling wool and is most commonly used for insulation and filtration. Two categories of glass wool based upon commercial application are insulation glass wool and special-purpose fibers. Insulation glass wools are used for applications such as thermal, electrical, and acoustical insulation and in weatherproofing, while the term “special-purpose glass fibers” is used to describe a category of fibers distinguished by their use in specialized products that include aircraft and aerospace insulation, battery separators, and high efficiency filters. Although having different uses, there is not a clear separation between the physico-chemical properties of insulation glass wools and special purpose fibers.

Glass wool (respirable size) is currently listed in the 11th RoC as reasonably anticipated to be a human carcinogen, and has been nominated for removal from the RoC. The draft background document reviews the literature on glass wool fibers. There are considerable differences in the chemical compositions and physical characteristics of glass fibers, which may influence the toxicology and potential carcinogenicity of the fibers. The expert panel will be asked to review glass wool fibers and make a recommendation on the listing status of glass wool fibers or categories of glass wool fibers in the RoC.

Preliminary Agenda and Registration

Preliminary agenda topics include:

- Oral public comments on glass wool fibers.
- Peer review of the draft background document on glass wool fibers.
- Recommendation on the listing status of glass wool fibers in the 12th RoC and scientific justification.

The meeting is scheduled for June 9–10, 2009, from 8:30 a.m. to adjournment each day. A copy of the preliminary agenda, expert panel roster, and any
