Development of Tiered Data Reporting To Inform TSCA Prioritization, Risk Evaluation, and Risk Management; Notice of Public Meeting and Opportunity To Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: On July 27, 2021, EPA's Office of Chemical Safety and Pollution Prevention (OCSPF) will hold a public meeting to engage with interested stakeholders on the development of a proposed rule for implementing a tiered data collection strategy to help inform the Agency's prioritization, risk evaluation, and risk management activities for chemical substances or mixtures under the Toxic Substances Control Act (TSCA). Currently, EPA primarily collects exposure-related data through the TSCA Chemical Data Reporting (CDR) process. EPA is interested in ensuring that data collection strategies provide information to better meet the Agency's basic chemical data needs, such as information related to exposure, health, and eco-toxicity. To this end, EPA is exploring a data reporting rule that is tied to specific stages of the TSCA existing chemicals program: Identifying a pool of substances as potential candidates for prioritization, Selecting candidate chemicals for and completing the prioritization process, and Assessing high-priority substances through a robust risk evaluation, which may be followed by risk management actions (depending on the outcome of the risk

evaluation). Feedback from the public meeting and comments received will help inform the Agency's development of a proposed rule.
