SUPPLEMENTARY INFORMATION: Section 108 (a) of the Clean Air Act directs the Administrator to identify certain pollutants which "may reasonably be anticipated to endanger public health and welfare" and to issue air quality criteria for them. These air quality criteria are to "accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air * * *." Under section 109 of the Act, EPA is then to establish National Ambient Air Quality Standards (NAAQS) for each pollutant for which EPA has issued criteria. Section 109 (d) of the Act requires subsequent periodic review and, if appropriate, revision of existing air quality criteria to reflect advances in scientific knowledge on the effects of the pollutant on public health and welfare. EPA is also to revise the NAAQS, if appropriate, based on the revised criteria.

Lead is one of six "criteria" pollutants for which EPA has established air quality criteria and NAAQS. On November 9, 2004 (69 FR 64926), EPA formally initiated its current review of the criteria and NAAQS for lead, requesting the submission of recent scientific information on specified topics. One of the next steps in this process was to prepare a project work plan for revision of the existing "Air Quality Criteria for Lead," EPA-600/8-83/028aF-dF (published in June 1986) and an associated supplement (EPA-600/8-89/049F) published in 1990. Accordingly, a draft of EPA's "Project Work Plan for Revised Air Quality Criteria for Lead" (NCEA-R-1465) was released on January 7, 2005, for public comment (70 FR 1439) and was discussed by the Clean Air Scientific Advisory Committee (CASAC) via a publicly accessible March 28, 2005, teleconference consultation (70 FR 11629). On July 15, 2005 (70 FR 41007), several workshops were announced to discuss, with invited recognized scientific experts, initial draft materials that dealt with various lead-related

issues being addressed in the draft AQCD for lead. These workshops were held August 4-5, 16-18, and 17-19, 2005. The first external review draft of the Air Quality Criteria for Lead (EPA/600/R-05/144aA-bA) was announced in the **Federal Register** on December 2, 2005 (70 FR 72300). The CASAC Lead Review Panel reviewed the first external review draft at a public meeting on February 28 and March 1, 2006. EPA considered the comments of the CASAC review panel and of the public in drafting this "Air Quality Criteria for Lead, Second External Review Draft."

After the end of the comment period on the "Air Quality Criteria for Lead, Second External Review Draft," the CASAC review panel will review the draft at a public meeting. Public comments received will be provided to the CASAC review panel. There will be a **Federal Register** notice to inform the public of the exact date and time of that CASAC meeting.

The

settlement will also resolve these parties' Casmalia Disposal Site-related liability for response costs incurred or to be incurred. The settling parties will pay a \$400,000 to EPA.

DATES: EPA will receive written comments relating to the settlement from May 22 to June 23, 2006. EPA will consider all comments it receives during this period, and may modify or withdraw its consent to the settlement if any comments disclose facts or considerations indicating that the settlement is inappropriate, improper, or inadequate.

In accordance with section 7003(d) of RCRA, 42 U.S.C. 6973(d), commenters may request an opportunity for a public meeting in the affected area.
