

may also include amendments to the Malheur National Forest Land and Resource Management Plan, as amended.

Possible Alternatives

The Forest Service will consider a range of alternatives. One of these will be the “no action” alternative in which none of the proposed action would be implemented. Additional alternatives may be included in response to issues raised by the public during the scoping process or due to additional concerns for resource values identified by the interdisciplinary team.

Responsible Official

The Forest Supervisor of the Malheur National Forest, 431 Patterson Bridge Road, John Day, OR 97845, is the Responsible Official. As the Responsible Official, I will decide if the proposed action will be implemented. I will document the decision and rationale for the decision in the Record of Decision. I have delegated the responsibility for preparing the draft EIS and final EIS to the District Ranger, Blue Mountain Ranger District.

Nature of Decision To Be Made

Based on the purpose and need, the Responsible Official reviews the proposed action, the other alternatives, the environmental consequences, and public comments on the analysis in order to make the following decision:

(1) Whether to implement timber harvest and associated fuels treatments, prescribed burning, and watershed work, including the design features and potential mitigation measures to protect resources; and if so, how much and at what specific locations;

(2) What, if any, specific project monitoring requirements are needed to assure design features and potential mitigation measures are implemented and effective, and to evaluate the success of the project objectives. A project specific monitoring plan will be developed.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. The interdisciplinary team will continue to seek information, comments, and assistance from Federal, State, and local agencies, Tribal governments, and other individuals or organizations that may be interested in, or affected by, the proposed action. There is a collaborative group in the area that the interdisciplinary team will interact with during the analysis process.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.
