The Federal Cave Resources Protection Act of 1988, 102 Stat. 4546, 16 U.S.C. 4301, requires identifying, protecting, and maintaining significant caves on public lands the Department of the Interior, BLM manages. The implementing regulations are found at 43 CFR 37-Cave Management. Federal agencies must consult with "cavers" and other interested parties and develop a list of significant caves. The regulations establish criteria for identifying significant caves and integrate cave management into existing planning and management processes to protect cave resource information. We protect this information to prevent vandalism and disturbance of significant caves. Other Federal or state agencies, bona fide educational or research institutes, or individuals or organizations who assist land management agencies with cave management activities may request access to confidential cave information. BLM uses the Significant Cave Nomination Worksheet to collect some of the requested information on cave management activities.

Based on BLM's experience administering this program, we estimate the public reporting burden is 3 hours for each nomination and 30 minutes for each request for confidential cave information. In FY 2000, BLM estimated 50 cave nominations and 10 requests for confidential cave information are filed annually, with a total annual burden of 155 hours. Respondents are cavers and other interested parties.

BLM will summarize all responses to this notice and include them in the request for OMB approval. All comments will become a matter of a public record.
