SYSTEM LOCATION:

The HUD Data Center which houses CHUMS and LAMS is located at the

Hewlett Packard (HP) Facility at 2020 Union Carbide Drive, South Charleston, West Virginia 25303–2734. HP is the designated records management facility for LAMS and the Atlanta Federal Records Center at 4712 Southpark Boulevard, Ellenwood, GA 30294 is the records management facility for CHUMS until LAMS is fully implemented. Additionally, HUD Headquarter staff and staff throughout the United States will or have access to CHUMS/LAMS through HUD's standard telecommunications network from desktop workstations, and access by HUD's business partners is granted via secure HTTPS through the HUD FHA Connection Portal. Internal and external HUD hosted locations are as follows: HUD headquarters building, 451 Seventh Street SW., Washington, DC 20410; the HUD owned and operated Field Offices and Home Ownership Centers¹, located in Atlanta, Denver, Philadelphia and Santa Ana.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have obtained a mortgage insured under HUD/FHA's single family mortgage insurance programs and individuals who unsuccessfully applied for mortgage insured by FHA. Also, individuals involved in the HUD/FHA single-family underwriting process (builders, appraisers, inspectors, mortgagee staff underwriters) and HUD employees involved in the single family underwriting process (e.g., appraisers, mortgage credit examiners, architectural employees, receiving clerks, assignment clerks, commitment clerks, records clerks, and closing clerks).

CATEGORIES OF RECORDS IN THE SYSTEM:

Automated files contain the following categories of records:

Mortgagors (Borrowers): name, address, social security number or other identification number, racial/ethnic background (if disclosed), and details about the mortgage loan, including loan application documentation. This information is supplied by lenders during the mortgage application and underwriting process.

Builders, Appraisers and Inspectors: name, address, social security number or other identification number, territory, workload, and minority data including racial/ethnic background, Minority Business Enterprise (MBE) Code, and sex, for statistical tracking purposes.

Mortgagee (Lender) Staff Appraisers and Underwriters: social security

number or other identification number, territory and workload of the individuals.

HUD Employees: name and social security number or other identifying number of employees involved in the single family underwriting process. This includes, but is not limited to: Homeownership Center managers, staff appraisers, architectural employees, receiving clerks, assignment clerks, commitment clerks, records clerks, and closing clerks.

Note: Certain records contained in this system which pertain to individuals contain principally proprietary information concerning sole proprietorships may also reflect personal information, however, only the records reflecting personal information are subject to the Privacy Act.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 203, National Housing Act, Public Law 73–479. The information collection enables HUD/FHA to process applications for HUD mortgage insurance and respond to inquiries regarding applications and insured mortgages; 42 U.S.C. 3543—Sec. 3543. Social Security Numbers are collected to prevent fraud and abuse in Department of Housing and Urban Development programs (enacted as part of the Housing and Community Development Act of 1987).

PURPOSE(S):

The Fair Housing Administration (FHA) Office of Single Family Housing intends to modify the Computerized Homes Underwriting Management System (CHUMS) and create a new routine use exception to permit the sharing of information to third party servicers to improve HUD's review and evaluation process for its mortgage insurance appraisal documentation. Additionally, a new Loan Application Management System (LAMS) is being developed to better assist FHA with its automated processing, analysis, and screening of the appraisal documentation. CHUMS supports FHA staff in the processing of appraisal documentation for single family mortgage insurance applications (From initial receipt through final endorsement). CHUMS processes loan applications for first time homebuyers, Home Equity Conversion Mortgages (HECM) for home owners, Section 203(k) for the rehabilitation of existing properties, Veteran Affairs (VA) Certified FHA loans and other FHA approved mortgage insurance programs. CHUMS also provides automated assistance in mortgage credit evaluation, and FHA's TOTAL Scorecard which is

a standardized credit assessment tool. It supports the conditional commitment process from the Mortgagee's request for property appraisal through issuance of a conditional commitment, firm commitment, endorsement, and the automated production of the Mortgage Insurance Certificate.

The new LAMS tool is being created to become the eventual replacement system for CHUMS. The existing functionality in CHUMS will be moved into LAMS in stages over the next five years. In its initial release, LAMS will enable HUD to start collecting case binder data into an industry-wide electronic format that is acceptable to the mortgage industry (Mortgage Industry Standard Maintenance Organization) data standards. The improved enhancements will allow HUD to screen out errors in the appraisal and endorsement process more proficiently. In the past, HUD has identified far too late in the appraisal and endorsement process when a loan was at risk or in danger of fraud. Implementing the new LAMS tool and new evaluation process will allow HUD to better evaluate errors in the appraisal and endorsement process, and avoid endorsing unqualified loans. FHA believes that having the mortgage insurance documentation evaluated earlier on in the process will over time have a tremendous impact on the performance of HUD's mortgage insurance programs. The existing HUD data collected on applications for single family mortgage insurance endorsements, includes electronic copies of mortgage documentation, along with the results of automated risk scoring and fraud validations, electronic copies of the lender submitted mortgage insurance appraisal records, the underlying data and metadata of documentation obtained in the application, underwriting, insuring and closing stages of the mortgage loan transaction will be used for risk management evaluation studies of the abovementioned mortgage insurance portfolios.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES.

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act other routine uses include:
