

regulated equipment must comply with the Commission's technical standards before it is approved for marketing. Rules governing certain equipment operating in the licensed service also require equipment authorization under 47 CFR part 2. In ET Docket No. 00-47, the FCC established a Class III "permissive change" to permit manufacturers to make changes that affect the frequency, power, and modulation parameters of software defined radios without having to file a new equipment authorization application. However, new software can not be loaded into radios until the FCC or a designated Telecommunications Certification Body (TCB) approves the manufacturer's software changes and test data showing compliance with FCC technical standards with the new software loaded. The FCC will also allow "electronic labeling" for software defined radio transmitters—a liquid crystal display or similar screen displays the FCC identification number, and since the new technology replaces existing technology, the basic authorization process will not change.

OMB Control Number: 3060-0934.

Title: Application for Equipment Authorization, 47 CFR Sections 2.925, 2.932, 2.944, 2.960, 2.962, 2.1043, 68.160, and 68.162.

Form Number: FCC TCB 731.

Type of Review: Revision of currently approved collection.

Respondents: Business or other for profit.

Number of Respondents: 1,600.

Estimated Time Per Response: 4 hrs.

Total Annual Burden: 6,400 hrs.

Total Annual Cost: \$175,000.

Needs and Uses: Under 47 CFR parts 15 and 18 of FCC Rules, certain equipment must comply with FCC technical standards before it can be marketed. Equipment that operates in the licensed service requires FCC authorization under 47 CFR Parts 2 and 68. In the 1998 R&O, General Docket No. 98-68, the FCC permits a private sector firm, a "Telecommunications Certification Body" or TCB, to approve equipment for marketing and also established guidelines for "Mutual Recognition Agreements" with foreign trade partners. Once approved by the accrediting body and "designated" by the FCC, TCBs may accept Form 731 filings and evaluate the equipment's compliance with FCC Rules and technical standards. The TCB submits this information to the FCC via the Internet. In ET Docket No. 00-47, the FCC established a Class III "permissive change" to permit manufacturers to make changes affecting frequency, power, and modulation parameters of

"software defined radios" without having to file a new equipment authorization application. The manufacturer must submit a description of the software changes to the FCC or a designated TCB. The FCC will also permit "electronic labeling" to be used on software defined radio transmitters.
