k. *Description of Request:* Wisconsin River Power Company (licensee) proposes to modify the requirements of Article 401 of the project license, and revise the approved Operations Compliance Monitoring Plan (OCMP) consistent with the proposed modifications to Article 401. In the pertinent part, Article 401 requires the licensee to limit any reduction in discharge from the Castle Rock Development to a down-ramping rate not to exceed 1-inch per hour as measured 0.7 miles downstream of Castle Rock dam. Under the licensee's proposal, the down-ramping rate would increase to 3.5-inches per hour as measured 0.7 miles downstream of Castle Rock dam. The proposed down-ramping requirement would only apply to reductions in flow from the Castle Rock powerhouse and only when inflows to the Petenwell impoundment are greater than 3,500 cubic feet per second. The licensee proposes revisions to the OCMP, which would provide further details on the down-ramping, minimum flow, and reservoir elevation requirements of the license.
