NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** Notice with a 60-day comment period on this information collection on March 3, 2008.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* 10 CFR Part 100, "Reactor Site Criteria."

3. *Current OMB approval number:* 3150-0093.

4. *The form number if applicable:* Not applicable.

5. *How often the collection is required:* As necessary in order for the NRC to assess the adequacy of proposed seismic design bases and the design bases for other site hazards for nuclear power and test reactors constructed and licensed in accordance with 10 CFR Parts 50 and 52 and the Atomic Energy Act of 1954, as amended.

6. *Who will be required or asked to report:* Applicants and licensees for nuclear power and test reactors.

7. *An estimate of the number of annual responses:* Approximately 5.33 (16 responses in three years). Note that this estimate was revised from the estimate published in the 60-day **Federal Register** Notice for this collection, in which the NRC estimated that it would receive 9 annual responses. The estimate was adjusted to better reflect the number of applications the NRC anticipates receiving during the three-year clearance period.

8. *The estimated number of annual respondents:* Approximately 5.33.

9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 389,090 (73,000 hours per applicant).

10. *Abstract:* 10 CFR Part 100, A Reactor Site Criteria, establishes approval requirements for proposed sites for the purpose of constructing and operating stationary power and testing reactors pursuant to the provisions of 10 CFR Parts 50 or 52. These reactors are required to be sited, designed, constructed, and maintained to withstand geologic hazards, such as faulting, seismic hazards, and the maximum credible earthquake, to protect the health and safety of the public and the environment. Non-seismic siting criteria must also be evaluated. Non-seismic siting criteria include such factors as population density, the proximity of man-related hazards, and site atmospheric dispersion characteristics. NRC uses the information required by 10 CFR Part 100 to evaluate whether natural phenomena and potential man-made hazards will be appropriately accounted for in the design of nuclear power and test reactors.

OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by July 2, 2008. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date.

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory
Commission (NRC).

ACTION: Notice of the OMB review of
information collection and solicitation
of public comment.

SUMMARY: The NRC has recently
submitted to OMB for review the
following proposal for the collection of
information under the provisions of the
Paperwork Reduction Act of 1995 (44
U.S.C. Chapter 35). The NRC hereby
informs potential respondents that an
agency may not conduct or sponsor, and
that a person is not required to respond
to, a collection of information unless it
displays a currently valid OMB control
number. The NRC published a **Federal
Register** Notice with a 60-day comment
period on this information collection on
February 14, 2008.

1. *Type of submission, new, revision,
or extension:* Extension.
2. *The title of the information
collection:* Notice of Enforcement
Discretion (NOEDs) For Operating
Power Reactors and Gaseous Diffusion
Plants (GDP) (NRC Enforcement Policy).
3. *Current OMB approval number:*
3150-0136.
4. *The form number if applicable:*
N/A.
5. *How often the collection is
required:* On occasion.
6. *Who is required or asked to report:*
Nuclear power reactor licensees and
gaseous diffusion plant certificate
holders.
7. *An estimate of the number of
annual responses:* Approximately 14.
8. *The estimated number of annual
respondents:* Approximately 14.
9. *An estimate of the total number of
hours needed annually to complete the
requirement or request:* 1,825.
10. *Abstract:* The NRC's Enforcement
Policy addresses circumstances in
which the NRC may exercise
enforcement discretion. A specific type
of enforcement discretion is designated
as a NOED and relates to circumstances
which may arise where a nuclear power
plant licensee's compliance with a

Technical Specification Limiting
Condition for Operation or other license
conditions would involve: (1) An
unnecessary plant shutdown; (2)
performance of testing, inspection, or
system realignment that is inappropriate
for the specific plant conditions; or (3)
unnecessary delays in plant startup
without a corresponding health and
safety benefit.

Similarly, for a gaseous diffusion
plant, circumstances may arise where
compliance with a Technical Safety
Requirement or other condition would
unnecessarily call for a total plant
shutdown, or, compliance would
unnecessarily place the plant in a
condition where safety, safeguards or
security features were degraded or
inoperable. A licensee or certificate
holder seeking the issuance of an NOED
must provide a written justification, in
accordance with guidance provided in
NRC Inspection Manual, Part 9900,
which documents the safety basis for
the request and provides whatever other
information the NRC staff deems
necessary to decide whether or not to
exercise discretion.

A copy of the final supporting
statement may be viewed free of charge
at the NRC Public Document Room, One
White Flint North, 11555 Rockville

given to comments received after this
date.
