k. *Description of Request*: Georgia Power Company (licensee) requests Commission approval to upgrade four generating units in the west Bartletts Ferry powerhouse. The licensee proposes to replace existing turbine runners, rehabilitate generators, and install new trashracks. The unit modifications would increase the installed capacity by 13.65 megawatts and increase the maximum hydraulic capacity by 5 cubic feet per second. To facilitate the proposed unit upgrades, the licensee may implement a reservoir drawdown. As required by license Article 401 *Project Operation and Lake Levels*, if a drawdown is needed for the proposed work, the licensee would consult with the Georgia Department of Natural Resources, the Alabama Department of Conservation and Natural Resources, and U.S. Fish and Wildlife Service Alabama Ecological Office. The licensee would also, notify the Alabama Department of Environmental Management and provide boat ramp elevations.

The proposed upgrades also include installing aerating turbine runners in three of the four turbine units (units 1, 2 and 4). The aerating turbine runners will enhance the project's ability to continue to achieve Georgia water quality standards by increasing the dissolved oxygen. Therefore, the licensee also requests to amend Article 403 *Tallrace Water Quality Enhancement* and Article 404 *Tallrace Water Quality Monitoring* of the project license to implement the proposed Dissolved Oxygen and Water Temperature Monitoring Plan following the unit upgrades.

"Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. Whether seeking a loan, Social Security benefits, veterans benefits, or other services provided by the Federal Government, individuals and businesses expect Government customer services to be efficient and intuitive, just like services from leading private-sector organizations. Yet the 2016 American Consumer Satisfaction Index and the 2017 Forrester Federal Customer Experience Index show that, on average, Government services lag nine percentage points behind the private sector.

A modern, streamlined and responsive customer experience means: raising government-wide customer experience to the average of the private sector service industry; developing indicators for high-impact Federal programs to monitor progress towards excellent customer experience and
