*Total Annual Burden:* 398,319 hours.

*Total Annual Cost:* No Cost.

*Needs and Uses:* The general purpose of the Commission’s Part 4 rules is to gather sufficient information regarding disruptions to telecommunications to facilitate FCC monitoring, analysis, and investigation of the reliability and security of voice, paging, and interconnected Voice over internet Protocol (interconnected VoIP) communications services, and to identify and act on potential threats to our Nation’s telecommunications infrastructure. The Commission uses this information collection to identify the duration, magnitude, root causes, and contributing factors with respect to significant outages, and to identify outage trends; support service

restoration efforts; and help coordinate with public safety officials during times of crisis. The Commission also maintains an ongoing dialogue with reporting entities, as well as with the communications industry at large, generally regarding lessons learned from the information collection in order to foster a better understanding of the root causes of significant outages and to explore preventive measures in the future so as to mitigate the potential scale and impact of such outages.

In a Second Report and Order adopted on November 18, 2022, as FCC 22–88, the Commission adopted rules harmonizing its 911 special facility notifications rules such that outage notifications from covered 911 service providers and originating service providers (OSPs) will include the same notification content, be transmitted by the same means, and with the same timing and frequency. In addition, in a Report and Order adopted on July 20, 2023, as FCC 23–57, the Commission extended outage reporting and notification requirements to outages affecting 988 special facilities in order to ensure that officials responsible for overseeing the 988 Suicide & Crisis Lifeline (988 Lifeline), which is a 24/7 hotline available to people in suicidal crisis and mental health distress, receive timely and actionable information about 988 service outages. The Commission’s existing Part 4 rules allow certain federal, state, and Tribal Nation agencies (Participating Agencies) to access to certain geographically relevant outage reports filed in the Commission’s Network Outage Reporting System (NORS).

The information collections and record keeping provisions adopted in the 2022 Second Report and Order will harmonize and standardize 911 outage reporting, which assists 911 special facilities in receiving and responding to service outage notification, and the information we are requiring to be contained in the reports will improve the speed and accuracy of responses to service outages by 911 service providers, which promotes public safety.

The information collections adopted in the 2023 988 Report and Order will allow the Department of Health and Human Services’ Substance Abuse and Mental Health Services Administration (SAMHSA), the Department of Veterans Affairs (VA), and the 988 Lifeline administrator, which are the entities responsible for overseeing the 988 Lifeline, to provide the public with notice of outages impacting 988 services, and information how they can access the 988 Lifeline despite the

outage. SAMHSA, the VA, and the 988 Lifeline administrator can also take steps to reroute 988 calls to available crisis centers and take other steps to reduce the amount of time that individuals would need to wait before they receive assistance. Notice about outages will allow SAMHSA, the VA, and the Lifeline administrator to continue meeting the immediate health needs of people in suicidal crisis and mental health distress. The Commission will also be able to improve 988 reliability by using this information to analyze outage trends and identify best practices to prevent and mitigate outages.

Federal Communications Commission.
