

aid the regulatory authority in the decision-making process to approve or disapprove a request.

Any person having an interest which is or may be adversely affected has the right to petition the regulatory authority to have an area designated as unsuitable for surface coal mining operations, or to have an existing designation terminated. At a minimum, the regulatory authority requires the following information:

(a) Petitioner's name, address, and telephone number are needed to identify the individual, company, etc., requesting the designation or termination.

(b) Identification of the area is required to determine the location of the area, its size and relationship to the section 522 areas.

(c) Petitioner's interest is needed to determine the status of petitioners for the validity of acceptance of the petition.

(d) Description of how mining of the area has affected, or how mining may affect people or the environment is needed to justify the unsuitability petition.

(e) Allegations of facts and supporting evidence are needed to comply with requirements of section 522(a) and (b).

To terminate designations of lands as unsuitable for surface mining operations, the regulatory authority must be provided with additional information as follows:

(a) Where the unsuitability determination was based on State or local land use plans, fragile or historic lands, loss of land productivity, or lands subject to natural hazards:

1. Discuss the nature or abundance of the protected resource affected.

Discuss the resources or conditions not being affected by mining operations in the surrounding area to ensure adequate protection of resources.

(b) Where the unsuitability petition was based on a finding that reclamation was not technologically or economically feasible, a demonstration that reclamation is now technologically and economically feasible. This is needed to determine the level of resources and the basis for termination of a designation.

The regulatory authority will use this information to identify, locate, compare and contrast the area, resources and conditions for the purpose of complying with section 522.
