

a number of areas of the proposed guidance, as well as commenting on other areas broadly related to an anthrax release/event that are outside the scope of this guidance (e.g., training and funding for vaccination). DHS, HHS and federal partners considered all of the comments and revised the document as appropriate. Specifically, we have increased the clarity of the document and better integrated guidance from the Occupational Safety and Health Administration (OSHA) and the National Institute for Occupational Safety and Health (NIOSH), including more specificity regarding the use of personal protective equipment (PPE). In addition, a number of changes were made to the document to accommodate evolving knowledge regarding the effectiveness of alternative interventions as well as federal policy in the areas of biological protection and response, particularly efforts to make medical countermeasures more readily available. This included incorporating recommendations from a report published by the Advisory Committee on Immunization Practices (ACIP) in the Morbidity and Mortality Weekly Report (MMWR), July 23, 2010, regarding the "Use of Anthrax Vaccine in the United States." To access the public comments, please go to the Federal eRulemaking Portal at <http://www.regulations.gov> and access the DHS summary describing the guidance (see Docket No. DHS-2009-0091).

DHS and HHS are now announcing the availability of a revised guidance document, *Guidance for Protecting Responders' Health During the First Week Following a Wide-Area Aerosol Anthrax Attack*. This guidance can be viewed or downloaded at <http://www.regulations.gov>, <http://phe.gov> and <http://www.dhs.gov/publication/protecting-responders-health-after-wide-area-aerosol-anthrax-attack>.

DHS developed this guidance in consultation with a federal interagency working group that included subject matter experts in biodefense, infectious diseases, and occupational health and safety. The working group included representatives from HHS; the Centers for Disease Control and Prevention (CDC), NIOSH; the Department of Labor, OSHA; and the Environmental Protection Agency (EPA).

The revised guidance reflects the current understanding of the unique environment that would be expected during the first week of a wide-area anthrax release, and is expected to evolve with changes to our understanding regarding exposure risk, scientific developments, and availability of new environmental monitoring

techniques. This guidance is intended to support ongoing planning and preparation efforts, as well as to lay the basis for plans to protect individuals beyond traditional first responders. This planning guidance will be refined as the evidence base is strengthened for determining exposure risk and the efficacy of protective measures. This guidance does not have the force or effect of law.

The DHS Office of Health Affairs is issuing the guidance document for public use on behalf of an interagency coalition.
