

mammals relative to the affected stock abundances; (4) Carnival's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action, and; (5) appropriate monitoring and reporting requirements are included.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must review our proposed action (*i.e.*, issuance of an IHA renewal) with respect to potential impacts on the human environment. This action is consistent with categories of activities identified in Categorical Exclusion B4 (incidental harassment authorizations with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS determined that the issuance of the initial IHA qualified to be categorically excluded from further NEPA review. NMFS has preliminarily determined that the application of this categorical exclusion remains appropriate for this renewal IHA.

Endangered Species Act

No incidental take of ESA-listed species is authorized or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

Renewal

NMFS has issued a renewal IHA to Carnival for the take of marine mammals incidental to conducting pile driving for the Long Beach Cruise Terminal improvement project at the Port of Long Beach, California from January 18, 2023 to December 9, 2023.

Dated: January 18, 2023.

CIE Review of the Atlantis Ecosystem Model in Support of Ecosystem-Based Fishery Management in the Gulf of Mexico Large Marine Ecosystem

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of public meeting.

SUMMARY: The NMFS will convene a peer-review of the Gulf of Mexico (GOM) Atlantis ecosystem model, in support of ecosystem-based fishery management in the Gulf of Mexico (GOM) large marine ecosystem. The purpose of the meeting is to facilitate a formal peer-review of the GOM Atlantis ecosystem model, to evaluate the model performance characteristics and to identify any appropriate EBFM applications in the southeast region that the GOM Atlantis model could be used to simulate. The external and independent peer review will be conducted by the Center for Independent Experts (CIE), which is a NOAA-supported, formal scientific peer-review process for evaluating scientific information to ensure quality and credibility. The public is invited to attend the presentations and discussions between the CIE review panel and the scientists who have participated in the development and internal, peer-review of the GOM Atlantis model.
