

OMB Approval No.: 3060-0788.

Title: DTV Showings/Interference Agreements.

Form No.: FCC 301/FCC 340.

Type of Review: Revision of currently approved collection.

Respondents: Businesses or other for-profit, not-for-profit institutions.

Number of Respondents: 350.

Estimated Hours Per Response: 55 hours (5 hours applicant; 40 hours consulting engineer; 10 hours attorney).

Frequency of Response: On occasion.

Cost to Respondents: \$2,800,000.

Estimated Total Annual Burden: 1,750 hours.

Needs and Uses: Section III-D of the FCC 301 and Section VII of the FCC 340 begin with a "Certification Checklist." This checklist contains a series of questions by which applicants may certify compliance with key processing requirements. The first certification requires conformance with the DTV Table of Allotments. The Commission allows flexibility for DTV facilities to be constructed at locations within five kilometers of the reference allotment sites without consideration of additional interference to analog or DTV service, provided the DTV service does not exceed the allotment reference height above average terrain or effective radiated power. In order for the Commission to process applications that cannot certify affirmatively, Section 73.623(c) requires applicants to submit a technical showing to establish that their proposed facilities will not result in additional interference to TV broadcast and DTV operations.

Additionally, the Commission permits broadcasters to agree to proposed DTV facilities that do not conform to the initial allotment parameters, even though they might be affected by potential new interference. The Commission will consider granting applications on the basis of interference agreements if it finds that such grants will serve the public interest. These agreements must be signed by all parties to the agreement. In addition, the Commission needs the following information to enable such public interest determinations: a list of parties predicted to receive additional interference from the proposed facility, a showing as to why a grant based on the agreements would serve the public interest, and technical studies depicting the additional interference.

This collection has been revised to remove all references to industry frequency coordination committees. These committees did not evolve. Respondents have been using consulting engineers and attorneys to prepare the

technical showings and interference agreements.

The technical showings and interference agreements will be used by FCC staff to determine if the public interest would be served by the grant of the application and to ensure that the proposed facilities will not result in additional interference.

OMB Control Number: 3060-0960.

Title: Application of Network Non-duplication Protection, Syndicated Exclusivity and Sports Blackout Rules to Satellite Retransmissions.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business of other for-profit entity.

Number of Respondents: 1,407.

Estimated Time Per Response: 0.50 hours per information request, and 1 hour per notification.

Total Annual Burden: 29,867 hours.

Total Annual Costs: \$716,808.

Needs and Uses: The information collection requirements in this Notice are used by the Commission to apply a satellite carrier's retransmission of superstations, network non-duplication, syndicated exclusivity and sports blackout rules as they currently apply to cable operators.

Federal Communications Commission.

FEDERAL COMMUNICATIONS COMMISSION

[FCC File No. EB-00-IH-0089/FCC 01-90]

Industry Guidance on the Commission's Case Law Interpreting 18 U.S.C. 1464 and Enforcement Policies Regarding Broadcast Indecency

AGENCY: Federal Communications Commission.

ACTION: Notice; policy statement.

SUMMARY: This document was issued by the Federal Communications Commission to provide guidance to the broadcast industry regarding the case law interpreting 18 U.S.C. 1464 and the FCC's enforcement policies with respect to broadcast indecency. By summarizing the regulations and explaining the FCC's analytical approach to reviewing allegedly indecent material, the FCC provides a framework by which broadcast licensees can assess the legality of airing potentially indecent material. Commissioner Ness and Commissioner Furchtgott-Roth of the FCC issued separate statements available from the FCC. Commissioner Tristani of the FCC dissented and issued a statement available from the FCC.

FOR FURTHER INFORMATION CONTACT:

Norman Goldstein, Assistant Chief, or Catherine Withers, Attorney, Investigations and Hearings Division, Enforcement Bureau, Federal Communications Commission, (202) 418-1420. This document is available from the FCC's web site at <http://www.fcc.gov/Bureaus/Enforcement/Orders/2001/fcc01090.doc> or you may visit the Reference Information Center at the FCC's headquarters located at 445 12th Street, SW., Room CY-A257, Washington, DC 20554. The FCC reference center is open to the public Monday through Thursday from 8 a.m. until 4:30 p.m. and Friday from 8 a.m. to 11:30 a.m. You may also reach the reference center at (202) 418-0270. As
