

stringent as the State's requirements. After review of this submittal, EPA concurs with TDEC's finding. The proposed changes are part of the Knox County strategy to meet the national ambient air quality standards by reducing the emissions of NO_x, a precursor of ozone formation. Because of the harmful health effects of ozone, EPA limits the amount of volatile organic compounds and NO_x that can be released into the atmosphere. This action is being taken pursuant to section 110 of the Clean Air Act. In the Final Rules Section of this **Federal Register**, the EPA is approving the State's SIP revisions as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no significant, material, and adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this rule. EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.
