

the 25 casks back to their original, pre-earthquake positions and spacing. If approved, the proposed license amendment would allow the casks to remain in their current positions.

The NRC has assessed the potential environmental impacts associated with the proposed action of amending SNM-2507 TS 4.2.3, as well as the no-action alternative, and has documented the results in the final EA (ADAMS Accession No. ML15022A575). The NRC staff performed its environmental review in accordance with the requirements in 10 CFR part 51. In conducting the environmental review, the NRC considered information in the license amendment application; information in the responses to the NRC's requests for additional information (RAIs); communications with Dominion, the Virginia State Historic Preservation Office, the Virginia Department of Game and Inland Fisheries and the Virginia Department of Health; information from the NRC inspections; and the NRC's independent analysis.

Approval of Dominion's proposed license amendment would allow the casks to remain in place at their current post-earthquake positions and spacing, and no changes to Dominion's operation and maintenance of the NA ISFSI are associated with the proposed action. Because the proposed action would authorize Dominion to leave the casks in their current positions, rather than taking action to return the casks to their pre-earthquake positions, no significant radiological or non-radiological impacts are expected to result from approval of the license amendment request, and the proposed action would not significantly contribute to cumulative impacts at the NA site. There would be no disproportionately high and adverse impacts on minority and low-income populations. The Virginia State Historic Preservation Office concurred with the NRC's determination that the proposed action would not affect historic properties, and the U.S. Fish and Wildlife Service concurred with the NRC's determination that the proposed action would not affect listed species or critical habitats. Furthermore, the NRC determined that the proposed action is more favorable than the no-action alternative (denial of the license amendment request), which would require movement of the casks back to their pre-earthquake positions and spacing. Thus, the NRC concludes that the proposed action will not result in a significant effect on the quality of the human environment.

III. Finding of No Significant Impact

Based on its review of the proposed action, in accordance with the requirements in 10 CFR part 51, the NRC has concluded that the proposed action, amendment of NRC Special Nuclear Materials License No. SNM-2507 for the NA ISFSI located in Louisa County, Virginia, will not significantly affect the quality of the human environment. Therefore, the NRC has determined, pursuant to 10 CFR 51.31, that preparation of an environmental impact statement is not required for the proposed action and a FONSI is appropriate.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 70-1151; NRC-2015-0039]

Westinghouse Electric Company, LLC

AGENCY: Nuclear Regulatory Commission.

ACTION: License amendment application; opportunity to request a hearing and to petition for leave to intervene.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has received an application from the Westinghouse Electric Company, LLC (Westinghouse or the licensee) to renew special nuclear material (SNM) license number SNM-1107 that authorizes Westinghouse to manufacture nuclear fuel assemblies at the Columbia Fuel Fabrication Facility (CFFF) in Hopkins, SC, for use in commercial nuclear power plants. The license renewal would allow Westinghouse to continue licensed activities for 40 years from the date that a renewed license is issued.

DATES: A request for a hearing or petition for leave to intervene must be filed by April 28, 2015.
