This is a new survey and a new OMB number is being requested. The response obligation will be mandatory.

3. The data will be collected, then summarized and analyzed, and, thereafter, be used for responding to a request from the Secretary of Energy and Congress regarding the level and extent of natural gas interruptions in the Northeastern United States, during December 1999, and January and February 2000.

4. Respondents will be customers of local distribution companies and pipeline companies with interruptible

The companies were identified by collecting information from natural gas local distribution companies and natural gas pipeline companies in the Northeastern United States.
