

advocacy organizations established under Title I of the Developmental Disabilities Assistance and Bill of Rights Act which submitted a timely application conforming to the requirements in the notice. The projects funded under this grant are part of SSA's strategy to increase the number of beneficiaries who return to work and achieve self-sufficiency as the result of receiving advocacy or other services. The overall goal of the program is to provide information and advice about obtaining vocational rehabilitation and

employment services and to provide advocacy or other services that a beneficiary with a disability may need to secure, maintain, or regain gainful employment.

Collection Activities

The PABSS project collects identifying information from the project sites and benefits specialists. In addition, data are collected from the beneficiaries on background, employment, training, benefits, and work incentives. SSA uses the

information to manage the program, with particular emphasis on contract administration, budgeting, and training.

SSA also uses the information to evaluate the efficacy of the program and to ensure that those dollars appropriated for PABSS services are being spent on SSA beneficiaries. The project data will be valuable to SSA in its analysis of and future planning for the Social Security Disability Insurance and Supplemental Security Income programs.

Type of Request: New information collection.

4. SSI Monthly Wage Reporting Phase 2 Pilot—20 CFR 416.701-732-0960-NEW

Supplemental Security Income (SSI) recipients are required to report changes in their income, resources and living arrangements that may affect eligibility or payment amount. Currently, SSI recipients report changes on Form SSA-8150, Reporting Events—SSI, or to an SSA teleservice representative through SSA's toll-free telephone number, or they visit their local Social Security office.

The SSI wage reporting program area has the highest error rate largely due to non-reporting, which accounts for approximately \$500 million in overpayments each year. Consequently SSA is evaluating methods for increasing reporting. SSA will conduct a pilot to test an additional method for individuals to report wages for the SSI program. We are testing to determine if, given an easily accessible automated format, individuals will increase compliance with reporting responsibilities. Increased timely reporting could result in a decrease in improper payments. SSA will also be testing the use of knowledge-based authentication to determine if this is an effective method of accessing SSA's system.

During the pilot, participants who need to report a change in earned income will call an SSA toll-free telephone number to report the change. The participants will access SSA's system using knowledge-based authentication (providing name, SSN and date of birth). Participants will either speak their report (voice

recognition technology) or key in the information using the telephone key pad. SSA will issue receipts to disabled recipients who report wages using this method. Respondents to this collection are SSI recipients, deemors and representative payees of recipients who agree to participate in the pilot.
