SUPPLEMENTARY INFORMATION: In response to the 2008 Atlantic Sea Scallop Research Set Aside (RSA) Program request for proposals, NMFS received a proposal from GMRI entitled, "An evaluation of hanging ratio and mesh orientation of twine-tops on selectivity and bycatch in the general category scallop dredge fishery in scallop limited access areas." The grant was approved by NOAA Grants on July 27, 2008, as NOAA Award No. NA08NMF4540667. GMRI proposes to determine if changes to the dredge twine-top configuration on a 10.5-ft (3.2 m) general category scallop dredge will affect species selectivity and reduce finfish bycatch.

Comparisons of catches will be made between panels with twine-top configurations of 2:1 hanging ratio, 3:1 hanging ratio with meshes elongated in the fore/aft direction, and 3:1 hanging ratio with meshes elongated laterally (perpendicular to the fore/aft direction). Research is to be conducted within the Elephant Trunk Access Areas (March/April 2009) and the Great South Channel Scallop Dredge Exemption Area (GSCDEA) (May/June 2009). Three general category scallop vessels using New Bedford style scallop dredges will be given a set of the three twine-top configurations, and will use one configuration per day for 12 days. It is expected that three tows per day will be completed, and vessels will spend 12 days in each of the two scallop access areas. The grant authorizes GMRI to land 14,400 lb (6,531.73 kg) of scallops each from the Elephant Trunk Access Area and GSCDEA (total of 28,800 lb (13,063.46 kg)), with the proceeds from landed scallops compensating participating vessel owners and defraying research costs. Vessels will stay within the daily landing limit of 400 lb (181.4 kg).

This EFP would exempt participating vessels from Scallop gear restrictions specified at 50 CFR 648.51(b)(2), possession restrictions found throughout part 648, Great South Channel (GSC) Southern New England (SNE)/Georges Bank (GB) Yellowtail Flounder Peak Spawning Closure restrictions at § 648.80(a)(18)(ii)(C), and GSC Cape Cod (CC)/Gulf of Maine

(GOM) Yellowtail Flounder Peak Spawning Closure restrictions at § 648.80(a)(18)(ii)(D).

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs. The applicant may place requests for minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and minimal so as not to change the scope or impact of the initially approved EFP request.
