SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify Class E airspace to support IFR operations at Klawock Airport, Klawock, AK.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically

invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at www.dot.gov/privacy.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at www.regulations.gov. Recently published rulemaking documents can also be accessed through the FAA's web page at www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the office at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S. 216th Street, Des Moines, WA 98198.

Incorporation by Reference

Class E5 airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace

Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Background

The FAA published an NPRM in the **Federal Register** for FAA 2023–1801 (88 FR 67124; September 29, 2023) to modify Class E airspace at the Klawock Airport. An extension was proposed to the northeast to be within 3 miles northwest and 3.3 miles southwest of the airport's 043° bearing, extending to 9 miles northeast of the airport to more appropriately contain departing IFR operations until reaching 1,200 feet above the surface and arriving IFR operations below 1,500 feet above the surface, when executing the CAALM 2 Area Navigation (RNAV) Departure Procedure or the RNAV Global Positioning System (GPS) RWY 20 and RNAV (GPS) M RWY 20 approaches. Subsequent to the publication of the NPRM, the FAA discovered that the extension should be within 3 miles northwest and 3.3 miles southeast of the 043° bearing, extending to 9 miles northeast of the airport. This SNPRM updates the FAA's proposal to correct that error.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to modify the Class E airspace extending upward from 700 feet above the surface and remove the Class E airspace extending upward from 1,200 feet above the surface at Klawock Airport, Klawock, AK.

The Class E airspace extending upward from 700 feet above the surface within a 6.7-mile radius should be reduced to a semicircle within the airport's 249° bearing clockwise to the 025° bearing, as operations are not authorized to the southeast of the airport and containment is not needed in that area.

In addition, an extension to the Class E airspace extending upward from 700 feet above the surface should be added to the northeast to be within 3 miles northwest and 3.3 miles southeast of the airport's 043° bearing extending to 9 miles northeast of the airport to more appropriately contain departing IFR operations until reaching 1,200 feet

above the surface and arriving IFR operations below 1,500 feet above the surface, when executing the CAALM 2 RNAV Departure Procedure or the RNAV (GPS) RWY 20 and RNAV (GPS) M RWY 20 approaches.

Moreover, the southwest procedure turn area should be removed, as it is no longer needed. In its place, a southwest extension to the Class E airspace extending upward from 700 feet above the surface should be added to be within 3.3 miles southeast and 3 miles northwest of the airport's 223° bearing, extending to 14.6 miles southwest of the airport. This extension would better contain departing IFR operations between the surface and 1,200 feet while executing the TURTY RNAV departure and arriving IFR operations below 1,500 feet above the surface while executing the RNAV (GPS) A, RNAV (GPS) M RWY 2, RNAV (GPS) Y RWY 2, or RNAV (GPS) Z RWY 2 approaches.

Furthermore, the Klawock Class E airspace beginning at 1,200 feet above the surface should be removed as it is redundant.

Finally, the FAA proposes administrative modifications to the airport's associated legal description. The Klawock Nondirectional Beacon/Distance Measuring Equipment navigational aid was decommissioned in 2017, and reference to it should be removed.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, *Environmental Impacts: Policies and Procedures*, prior to any FAA final regulatory action.
