Background

The RMP/EIS analyzed four alternatives to manage natural and cultural resources, visitor use and access, grazing, and maintenance of desired resource, economic and quality-of-life conditions. Alternative 1, the no action alternative, represents the continuation of existing management decisions within the National Conservation Area and Sonoita Valley Acquisition Planning District. Alternative 2, the proposed plan or BLM's preferred alternative, emphasizes ecosystem management and the use of partnerships and collaboration to achieve desired resource conditions. Alternative 3 proposes allowing the greatest mix of land uses with restrictions to protect sensitive areas and with fewer road closures and restrictions than the other alternatives. Alternative 4 emphasizes land use closures and restrictions and limits on development to achieve desired resource conditions making it the most restrictive of the alternatives.

The proposed plan (Alternative 2) is designed to achieve or maintain desired future conditions developed through the Sonoita Valley Planning Partnership process. Under the preferred alternative land use plan, the public lands are open to livestock grazing and dispersed recreation, both motorized and mechanized vehicles are limited to designated routes, and recreation is managed within three zones. Two utility corridors are established and the public lands are closed to mineral entry and location. The public lands in the planning area will be designated as an Area of Critical Environmental Concern (ACEC) upon approval of the RMP. The preferred alternative (Alternative 2) includes a series of management actions to meet the desired resource conditions for upland and riparian vegetation, wildlife habitats, and cultural and visual resources as well as livestock grazing and recreation management actions.

Dated: April 29, 2002.

Denise Meridith,

State Director.
