Needs and Uses: FCC Form 302–TV is used by licensees and permittees of TV broadcast stations to obtain a new or modified station license and/or to notify the Commission of certain changes in the licensed facilities of these stations. FCC staff use the data to confirm that the station has been built to terms specified in the outstanding construction permit.

FCC Form 340 is used to apply for authority to construct a new noncommercial educational FM and TV stations or to make changes in the existing facilities of such a station. The FCC Form 340 is to be used for channels that are reserved exclusively for noncommercial educational use and on non-reserved channels if the applicant proposes to build and operate a Noncommercial Educational Broadcast Station.

Existing authorized noncommercial educational analog stations seeking to receive authorization for commencement of Digital TV (DTV) operation must file FCC Form 340 for a construction permit. This application may be filed anytime after receiving the initial DTV channel allotment, but must be filed before the mid-point in a particular applicant's required construction period. The Commission will consider these applications as minor changes in facilities. Applicants do not have to supply full legal or financial qualification information. In addition, applicants for a newly allotted DTV channel reserved for noncommercial educational use(s) must also file the FCC Form 340.

FCC Form 349 is used to apply for authority to construct a new FM translator or FM booster broadcast station, or to make changes in the existing facilities of such stations. This form also includes the third party disclosure requirement of 47 CFR 73.3580. Section 73.3580 requires local public notice in a newspaper of general circulation of all application filings for new or major change in facilities. This notice must be completed within 30 days of the tendering of the application. This notice must be published at least twice a week for two consecutive weeks in a three-week period. A copy of this notice must be placed in the public

inspection file along with the application.

SUPPLEMENTARY INFORMATION: On November 23, 2005, Frontier Telephone of Rochester, Inc. (Frontier) filed a petition for declaratory ruling that USA Datanet (Datanet) and any similarly situated carriers must pay tariffed

originating interstate access charges for Feature Group A calls from Frontier's end users. Frontier filed its petition after the United States District Court for the Western District of New York stayed Frontier's case seeking payment of access charges from Datanet for originating Feature Group A access services. The court found it appropriate to stay the case pending the FCC's resolution of the issues raised by Frontier. In its petition, Frontier seeks a declaratory ruling that it is owed originating access charges for IP-transported Feature Group A calls for the following interstate access rate elements: (1) End office common trunk port; (2) end office local switching; (3) local transport tandem transmission—fixed; and (4) local transport tandem transmission facility. Frontier asks for consolidation of its petition with existing WC Docket No. 05–276, which is examining petitions for declaratory rulings filed by SBC and VarTec on similar IP access charge issues. We will include Frontier's petition in WC Docket No. 05–276 due to the similarity of the issues raised in the petition and in that docket.
