

However, pursuant to Rule 19b-4(f)(6)(iii),⁶² the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing and trading of options on the Fidelity Fund.⁶³ The Exchange has provided information regarding the underlying Fidelity Fund, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of the Fidelity Fund. The proposal also establishes position and exercise limits for options on the Fidelity Fund and provides information regarding the surveillance procedures that will apply to Fidelity Fund options. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Fidelity Fund options. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.⁶⁴

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or

- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBZX-2025-056 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeBZX-2025-056. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBZX-2025-056 and should be submitted on or before May 8, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶⁵

Sherry R. Haywood,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102832; File No. SR-MIAX-2025-19]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities, Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits To Allow the Exchange To List and Trade Options on the iShares Ethereum Trust

April 11, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 10, 2025, Miami International Securities Exchange, LLC ("MIAX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Exchange Rule 402, Criteria for Underlying Securities, Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits, to list and trade options on the iShares Ethereum Trust (the "Trust").

The text of the proposed rule change is available on the Exchange's website at <https://www.miaxglobal.com/markets/us-options/all-options-exchanges/rule-filings>, at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

⁶² 17 CFR 240.19b-4(f)(6)(iii).

⁶³ See *supra* note 6.

⁶⁴ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁶⁵ 17 CFR 200.30-3(a)(12).

the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 402, Criteria for Underlying Securities, Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits,³ to allow the Exchange to list and trade options on the Trust, designating it as appropriate for options trading on the Exchange.⁴ This is a competitive filing based on a similar proposal submitted by Nasdaq ISE, LLC ("ISE"), which was approved by the Securities and Exchange Commission (the "Commission").⁵

Current Exchange Rule 402(i)(4) provides that securities deemed appropriate for options trading include shares or other securities ("Exchange Traded Fund Shares" or "ETFs") that are traded on a national securities exchange and are defined as "NMS stock" under Rule 600 of Regulation NMS, and that meet specified criteria enumerated in the rule. Subparagraph (4) of Exchange Rule 402(i) provides that such shares or other securities:

(4) are issued by the SPDR® Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the Aberdeen Standard Silver ETF Trust, the Aberdeen Standard Physical Gold Trust, the Aberdeen Standard Palladium ETF Trust, the Aberdeen Standard Platinum ETF Trust, the Goldman Sachs Physical Gold ETF, the Sprott Physical Gold

³ The Exchange notes that its affiliate options exchanges, MIAx PEARL, LLC ("MIAx Pearl") and MIAx Sapphire, LLC ("MIAx Sapphire"), submitted (or will submit) substantively similar proposals. The Exchange notes that all the rules of Chapter III of MIAx, including Exchange Rules 307 and 309, are incorporated by reference into the MIAx Pearl and MIAx Sapphire rulebooks. The Exchange also notes that all of the rules of Chapter III of MIAx, including Exchange Rules 307 and 309, and the rules of Chapter IV of MIAx, including Exchange Rule 402, are incorporated by reference into the MIAx Emerald, LLC ("MIAx Emerald") rulebook.

⁴ See Securities Exchange Act Release Nos. 100224 (May 23, 2024), 89 FR 46937 (May 30, 2024) (SR-NYSEArca-2023-70; SR-NYSEArca-2024-31; SR-NASDAQ-2023-045; SR-CboeBZX-2023-069; SR-CboeBZX-2023-070; SR-CboeBZX-2023-087; SR-CboeBZX-2023-095; and SRCboeBZX-2024-018) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Shares of Ether-Based Exchange-Traded Products) ("Ethereum ETP Approval Order").

⁵ See Securities Exchange Act Release No. 102738 (April 9, 2025) (Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, to Permit the Listing and Trading of Options on the iShares Ethereum Trust) (SR-ISE-2024-35) ("ISE Ether Approval Order").

Trust, the iShares Bitcoin Trust, the Grayscale Bitcoin Trust, the Grayscale Bitcoin Mini Trust, the Bitwise Bitcoin ETF, the Fidelity Wise Origin Bitcoin Fund, or the ARK 21 Shares Bitcoin ETF . . .

In addition to the aforementioned requirements, Exchange Rule 402(i)(5)(i)(A) or (B) must be met to list options on ETFs.⁶

Proposal

The Exchange proposes to amend Exchange Rule 402(i)(4) to expand the list of securities that are appropriate for options trading on the Exchange to include the Trust.⁷

Description of the Trust⁸

The shares are issued by the Trust, a Delaware statutory trust. The Trust will operate pursuant to a trust agreement (the "Trust Agreement") between the Sponsor, BlackRock Fund Advisors (the "Trustee") as the trustee of the Trust and will appoint Wilmington Trust, National Association, as Delaware Trustee of the Trust (the "Delaware Trustee") by such time that the Registration Statement is effective. The Trust issues shares representing fractional unshared beneficial interests in its net assets. The assets of the Trust will consist only of Ether ("Ether" or "Ethereum") held by a custodian on behalf of the Trust, except under limited circumstances when transferred through the Trust's prime broker temporarily (described below), and cash. Neither the Trust, nor the Sponsor, nor the Ether Custodian (as defined below), nor any other person associated with the Trust will, directly or indirectly, engage in action where any portion of the Trust's Ether becomes subject to the Ethereum proof-of-stake validation or is used to earn additional Ether or generate

⁶ Exchange Rule 402(i)(5)(i)(A) or (B) states that the Exchange-Traded Fund Shares either (i) meet the criteria and guidelines set forth in paragraphs (a) and (b) described herein; or (ii) the Exchange-Traded Fund Shares are available for creation or redemption each business day from or through the issuing trust, investment company, commodity pool or other entity in cash or in kind at a price related to net asset value, and the issuer is obligated to issue Exchange-Traded Fund Shares in a specified aggregate number even if some or all of the investment assets and/or cash required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investment assets has undertaken to deliver them as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer of the Exchange-Traded Fund Shares, all as described in the Exchange-Traded Fund Shares' prospectus.

⁷ Specifically, the Exchange proposes to amend Exchange Rule 402(i)(4) to include the name of the Trust to enable options to be listed on the Trust on the Exchange.

⁸ See SR-NASDAQ-2023-045 for a complete description of the Trust.

income or other earnings. Coinbase Custody Trust Company, LLC (the "Ether Custodian"), is the custodian for the Trust's Ether holdings, and maintains a custody account for the Trust ("Custody Account"); Coinbase, Inc. (the "Prime Execution Agent"), an affiliate of the Ether Custodian, is the prime broker for the Trust and maintains a trading account for the Trust ("Trading Account"); and The Bank of New York Mellon is the custodian for the Trust's cash holdings (the "Cash Custodian" and together with the Ether Custodian, the "Custodians") and the administrator of the Trust (the "Trust Administrator"). Under the Trust Agreement, the Trustee may delegate all or a portion of its duties to any agent, and has delegated the bulk of the day-to-day responsibilities to the Trust Administrator and certain other administrative and recordkeeping functions to its affiliates and other agents. The Trust is not an investment company registered under the Investment Company Act of 1940, as amended.

The investment objective of the Trust is to reflect generally the performance of the price of Ether. The Trust seeks to reflect such performance before payment of the Trust's expenses and liabilities. The Shares are intended to constitute a simple means of making an investment similar to an investment in Ether through the public securities market rather than by acquiring, holding and trading Ether directly on a peer-to-peer or other basis or via a digital asset platform. The Shares have been designed to remove the obstacles represented by the complexities and operational burdens involved in a direct investment in Ether, while at the same time having an intrinsic value that reflects, at any given time, the investment exposure to the Ether owned by the Trust at such time, less the Trust's expenses and liabilities. Although the Shares are not the exact equivalent of a direct investment in Ether, they provide investors with an alternative method of achieving investment exposure to Ether through the public securities market, which may be more familiar to them.

Custody of the Trust's Ether and Creation and Redemption

An investment in the shares is backed by Ether held by the Ether Custodian on behalf of the Trust. All of the Trust's Ether will be held in the Custody Account, other than the Trust's Ether which is temporarily maintained in the Trading Account under limited circumstances, *i.e.*, in connection with

creation and redemption Basket⁹ activity or sales of Ether deducted from the Trust's holdings in payment of Trust expenses or the Sponsor's fee (or, in extraordinary circumstances, upon liquidation of the Trust). The Custody Account includes all of the Trust's Ether held at the Ether Custodian, but does not include the Trust's Ether temporarily maintained at the Prime Execution Agent in the Trading Account from time to time. The Ether Custodian will keep all of the private keys associated with the Trust's Ether held in the Custody Account in "cold storage".¹⁰ The hardware, software, systems, and procedures of the Ether Custodian may not be available or cost effective for many investors to access directly.

The Exchange believes that offering options on the Trust will benefit investors by providing them with an additional, relatively lower cost investing tool to gain exposure to spot Ether as well as a hedging vehicle to meet their investment needs in connection with Ether products and positions. Similar to other commodity ETFs in which options may be listed on the Exchange (e.g., the SPDR[®] Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the Aberdeen Standard Physical Gold Trust, the iShares Bitcoin Trust, the Grayscale Bitcoin Trust, the Grayscale Bitcoin Mini Trust, Bitwise Bitcoin ETF, the Fidelity Wise Origin Bitcoin Fund, or the ARK 21Shares Bitcoin ETF),¹¹ the proposed ETF is a trust that essentially offers the same objectives and benefits to investors.

Options on the Trust will trade in the same manner as any other ETF options on the Exchange. Exchange Rules that currently apply to the listing and trading of all ETFs options on the Exchange, including, for example, Exchange Rules that govern listing criteria, expiration and exercise prices, minimum increments, position and exercise limits (including as proposed herein), margin requirements, customer accounts and trading halt procedures will apply to the listing and trading of options on the Trust on the Exchange. Today, these rules apply to options on

the various commodities ETFs deemed appropriate for options trading on the Exchange pursuant to current Exchange Rule 402(i)(4).

The Exchange's initial listing standards for ETFs on which options may be listed and traded on the Exchange will apply to the Trust. The initial listing standard as set forth in Exchange Rule 402(a) provides that

Underlying securities with respect to which put or call options contracts are approved for listing and trading on the Exchange must meet the following criteria: (1) the security must be registered and be an "NMS stock" as defined in Rule 600 of Regulation NMS under the Exchange Act; and (2) the security shall be characterized by a substantial number of outstanding shares that are widely held and actively traded.

Pursuant to Exchange Rule 402, ETFs on which options may be listed and traded must satisfy the listing standards set forth in Exchange Rule 402(5). Specifically, the Trust must:

(1) meet the criteria and standards set forth in Exchange Rule 402(a) or 402(b),¹² or

(2) be available for creation or redemption each business day from or through the issuer in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue ETFs in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus.

Options on the Trust will also be subject to the Exchange's continued listing standards set forth in Exchange Rule 403(g). Specifically, options approved for trading pursuant to Exchange Rule 402(i) will not be deemed not to meet the requirements for continued approval, and the Exchange shall not open for trading any additional series of option contracts of the class covering that such ETFs, if the ETFs cease to be an NMS stock or the ETFs, are delisted from trading pursuant to Exchange Rule 403(b)(4), or the ETFs are halted or suspended from trading in their primary market.¹³ In addition, the Exchange shall consider the suspension of opening transactions in any series of

options of the class covering ETFs in any of the following circumstances:

(1) in the case of options covering ETFs approved for trading under Exchange Rule 402(i)(5)(i)(A), in accordance with the terms of paragraphs (b)(1), (2), and (3) of Exchange Rule 403;¹⁴

(2) in the case of options covering ETFs approved for trading under Exchange Rule 402(i)(5)(i)(B), following the initial twelve-month period beginning upon the commencement of trading in the ETFs on a national securities exchange and are defined as an NMS stock, there are fewer than 50 record and/or beneficial holders of such ETFs for 30 or more consecutive trading days;

(3) the value of the index or portfolio of securities, non-U.S. currency, or portfolio of commodities including commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or financial instruments and money market instruments on which the ETFs are based is no longer calculated or available; or

(4) such other event shall occur or condition exist that in the opinion of the Exchange makes further dealing in such options on the Exchange inadvisable.

Options on the Trust would be physically settled contracts with American-style exercise.¹⁵ Consistent with current Exchange Rule 404, which governs the opening of options series on a specific underlying security (including ETFs), the Exchange will open at least one expiration month for options on the Trust¹⁶ at the commencement of trading

¹⁴ Exchange Rules 403(b)(1) through (4) provides, if: (1) there are fewer than 6,300,000 shares of the underlying security held by persons other than those who are required to report their security holdings under Section 16(a) of the Act, (2) there are fewer than 1,600 holders of the underlying security, (3) the trading volume (in all markets in which the underlying security is traded) has been less than 1,800,000 shares in the preceding twelve (12) months, or (4) the underlying security ceases to be an "NMS stock" as defined in Rule 600 of Regulation NMS under the Act.

¹⁵ See Exchange Rule 401, which provides that the rights and obligations of holders and writers are set forth in the Rules of the Options Clearing Corporation ("OCC"); see also OCC Rules, Chapters VIII (which governs exercise and assignment) and Chapter IX (which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts).

¹⁶ See Exchange Rule 404(b). The monthly expirations are subject to certain listing criteria for underlying securities described within Exchange Rule 404 and its Interpretations and Policies. Monthly listings expire the third Friday of the month. The term "expiration date" (unless separately defined elsewhere in the OCC By-Laws), when used in respect of an option contract (subject to certain exceptions), means the third Friday of the expiration month of such option contract, or if such

⁹ The Trust issues and redeems Shares only in blocks of 40,000 or integral multiples thereof. A block of 40,000 shares is called a "Basket." These transactions take place in exchange for ether.

¹⁰ The term "cold storage" refers to a safeguarding method by which the private keys corresponding to the Trust's ether are generated and stored in an offline manner, subject to layers of procedures designed to enhance security. Private keys are generated by the Ether Custodian in offline computers that are not connected to the internet so that they are more resistant to being hacked.

¹¹ See Exchange Rule 402(i)(4).

¹² Subparagraphs a. and b. of Exchange Rule 402 provide for guidelines to be used by the Exchange when evaluating potential underlying securities for Exchange option transactions.

¹³ See Exchange Rule 403(g).

on the Exchange and may also list series of options on the Trust for trading on a weekly,¹⁷ monthly,¹⁸ or quarterly¹⁹ basis. The Exchange may also list long-term equity option series (“LEAPS”) that expire from 12 to 39 months from the time they are listed.²⁰

Pursuant to Exchange Rule 404, Interpretations and Policies .06, which governs strike prices of series of options on ETFs, the interval between strike prices of series of options on ETFs approved for options trading pursuant to Exchange Rule 402(i) shall be fixed at a price per share which is reasonably close to the price per share at which the underlying security is traded in the primary market at or about the same time such series of options is first open for trading on the Exchange, or at such intervals as may have been established on another options exchange prior to the initiation of trading on the Exchange. With respect to the Short Term Options Series or Weekly Program, during the month prior to expiration of an option class that is selected for the Short Term Option Series Program, the strike price intervals for the related non-Short Term Option (“Related non-Short Term Option”) shall be the same as the strike price intervals for the Short Term Option.²¹ Specifically, the Exchange may open for trading Short Term Option Series at strike price intervals of (i) \$0.50 or greater where the strike price is less than \$100, and \$1 or greater where the strike price is between \$100 and \$150 for all option classes that participate in the Short Term Options Series Program; (ii) \$0.50 for option classes that trade in one dollar increments and are in the Short Term Option Series Program; or (iii) \$2.50 or greater where the strike price is above

Friday is a day on which the exchange on which such option is listed is not open for business, the preceding day on which such exchange is open for business. See OCC By-Laws Article I, Section 1. Pursuant to Exchange Rule 404(c), additional series of options of the same class may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying stock moves more than five strike prices from the initial exercise price or prices. Pursuant to Exchange Rule 404(e), new series of options on an individual stock may be added until the beginning of the month in which the options contract will expire. Due to unusual market conditions, the Exchange, in its discretion, may add a new series of options on an individual stock until the close of trading on the business day prior to expiration.

¹⁷ See Exchange Rule 404, Interpretations and Policies .02.

¹⁸ See Exchange Rule 404, Interpretations and Policies .13.

¹⁹ See Exchange Rule 404, Interpretations and Policies .03.

²⁰ See Exchange Rule 406.

²¹ See Exchange Rule 404, Interpretations and Policies .02(e).

\$150.²² Additionally, the Exchange may list series of options pursuant to the \$1 Strike Price Interval Program,²³ the \$0.50 Strike Program,²⁴ and the \$2.50 Strike Price Program.²⁵ Pursuant to Exchange Rule 510, where the price of a series of options on the Trust is less than \$3.00, the minimum increment will be \$0.05, and where the price is \$3.00 or higher, the minimum increment will be \$0.10²⁶ consistent with the minimum increments for options on other ETFs listed on the Exchange. Any and all new series of Trust options that the Exchange lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Exchange Rules 404 and 510, as applicable.

Trust options will trade in the same manner as any other ETF options on the Exchange. The Exchange Rules that currently apply to the listing and trading of all ETFs options on the Exchange, including, for example, Exchange Rules that govern listing criteria, expiration and exercise prices, minimum increments, position and exercise limits (including as proposed herein), margin requirements, customer accounts and trading halt procedures will apply to the listing and trading of Trust options on the Exchange in the same manner as they apply to other options on all other ETFs that are listed and traded on the Exchange, including the precious-metal backed commodity ETFs already deemed appropriate for options trading on the Exchange pursuant to current Exchange Rule 402(i)(4).

Position and exercise limits for options on ETFs, including options on the Trust, are determined pursuant to Exchange Rules 307 and 309, respectively. Position and exercise limits for ETF options vary according to the number of outstanding shares and the trading volumes of the underlying ETF over the past six months, where the largest in capitalization and the most frequently traded ETFs have an option position and exercise limits of 250,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market; and smaller capitalization ETFs have position and exercise limits of 200,000, 75,000, 50,000 or 25,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market. Further, Exchange Rule 1502, which governs margin

²² *Id.*

²³ See Exchange Rule 404, Interpretation and Policy .01.

²⁴ See Exchange Rule 404, Interpretation and Policy .04.

²⁵ See Exchange Rule 404(f).

²⁶ See Exchange Rule 510.

requirements applicable to trading on the Exchange, including options on ETFs, will also apply to the trading of the Trust options.

Notwithstanding the position limits in Exchange Rule 307(d) and exercise limits in Exchange Rule 309, the Exchange proposes the position and exercise limits for the options on the Trust to be 25,000 contracts on the same side pursuant to proposed Interpretation and Policy .01 to Exchange Rule 307 and proposed Interpretation and Policy .01 to Exchange Rule 309.

Position and exercise limits are designed to limit the number of options contracts traded on the Exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. These limits, which are described in Exchange Rules 307 and 309, are intended to address potential manipulative schemes and adverse market impacts surrounding the use of options, such as disrupting the market in the security underlying the options. Position and exercise limits must balance concerns regarding mitigating potential manipulation and the cost of inhibiting potential hedging activity that could be used for legitimate economic purposes.

In considering the appropriate position and exercise limits for the Trust options, the Exchange reviewed the data presented by ISE in its filing. ISE considered the Trust’s market capitalization and average daily volume (“ADV”) against those of other underlying securities, as well as the proposed position and exercise limit in relation to other options.²⁷ In measuring the Trust against other securities, ISE aggregated market capitalization and volume data for securities that have defined position limits utilizing data from The Options Clearing Corporation (“OCC”).²⁸ ISE also considered the trading volume for the Trust in terms of daily and notional volumes during the period of time the Trust had been trading from July 23, 2024 through December 14, 2024. The average daily volume for this time period was 5,302,533 shares and the average notional volume for this time period was \$127,825,276.00. The Trust had 93,352 shareholders.²⁹ ISE indicated both the average daily volume and the average notional volume experienced an

²⁷ See *supra* note 5.

²⁸ ISE represented these computations were based on OCC data from October 22, 2024, and that data displaying zero values in market capitalization or ADV were removed.

²⁹ ISE represented it obtained this number from Broadridge Financial Solutions, Inc. on December 19, 2024.

uptick at launch (which can be typical for anticipated product launches) then levelled off for several months. Renewed growth in the cryptocurrency market caused increased growth beginning in early November 2024.

ISE reviewed the market capitalization and ADV of 3,930 options on single stock securities excluding ETFs.³⁰ Next, ISE aggregated this data based on market capitalization and ADV and grouped option symbols by position limit utilizing statistical thresholds for ADV and market capitalization for each position limit category (*i.e.* 25,000, 50,000 to 65,000, 75,000, 100,000 to less than 250,000, 250,000 to less than 500,000, 500,000 to 1,000,000 and greater than 1,000,000). Exchange Rule 307 sets out position limits for various contracts. For example, like ISE, a 25,000 contract limit applies to those options having an underlying security that does not meet the requirements for a higher options contract limit. ISE indicated it performed this exercise to demonstrate the Trust's position limit relative to other options symbols in terms of market capitalization and ADV. For reference the market capitalization for the Trust was 1.16 billion³¹ with an ADV, for the preceding three months prior to October 22, 2024, of greater than 2.99 million shares. By comparison, other options symbols with similar market capitalization and ADV have a position limit of 50,000 contracts or 75,000 contracts.³² From a 90-day ADV perspective, ISE reviewed statistics that indicated that the Trust had a 90-day ADV greater than each of the stocks in the 100,000 contracts to 249,000 contracts range. Therefore, the proposed 25,000 same side position and exercise limits for options on the Trust are conservative.

Second, ISE reviewed the Trust's data relative to the market capitalization of the entire Ether market in terms of exercise risk and availability of deliverables. Utilizing data as of October 22, 2024, there were 120,392,960 Ethereum in circulation. The price of Ethereum on October 22, 2024, was \$2,620 per coin which equates to a

market capitalization of greater than \$315 billion US dollars. If a position limit of 25,000 options were considered (the position limit that would be typically assigned based upon data), the exercisable risk would represent less than 4.3524% of the outstanding shares of the Trust.³³ Since the Trust has a creation and redemption process managed through the issuer, additionally ISE compared the position limit sought to the total market capitalization of the entire Ethereum market. In this case, the exercisable risk represented by 25,000 options on the Trust would be less than 0.03% of the market capitalization of all outstanding Ether. Assuming a scenario where all 25,000 options on Ether shares were exercised given the proposed 25,000 per same side position limit, this would have a virtually unnoticed impact on the entire Ether market. This analysis by ISE demonstrates that the proposed 25,000 per same side position limit (and exercise limit) is conservative and appropriate for options on the Trust.

Third, ISE reviewed the proposed position limit by comparing it to position limits for derivative products regulated by the Commodity Futures Trading Commission ("CFTC"). While the CFTC, through the relevant Designated Contract Markets, only regulates options positions based upon delta equivalents (creating a less stringent standard), ISE examined equivalent Ether futures position limits. In particular, ISE looked at the CME Ethereum futures contract³⁴ that has a position limit of 8,000 futures.³⁵ On October 22, 2024, CME Ether futures settled at \$2,629. Using a contract multiplier of \$50, a position limit of 8,000 futures would have a notional value \$1.0516 billion ($8,000 \times \$50 \times \$2,629$). Using an October 22, 2024, share price of \$19.91 for shares of the Trust, a futures position of 8,000 contracts, with a notional value of \$1.0516 billion dollars would equate to an options position of 528,176 contracts ($\$1.0516 \text{ billion (notional value of 8,000 Ethereum futures contracts)} / \$19.91 \text{ (price of the Trust shares)} = 52,817,679 \text{ (Trust shares)} / 100 \text{ (the number of shares represented by one options contract)} = 528,176 \text{ options contracts}$). Because substantial sums of any distributed options portfolio are likely to be out of

the money on expiration, an options position limit equivalent to the CME position limit for Ethereum (considering that all options deltas are ≤ 1.00) should be a bit higher than the CME implied 528,176 contract limit.

The Exchange notes, unlike options contracts, CME position limits are calculated on a net futures-equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an aggregation ratio(s).³⁶ Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.³⁷ If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading but does not exceed the limits when evaluated using the previous day's delta factors, then the position shall not constitute a position limit violation. Considering CME's position limits on futures for Ethereum, the Exchange believes that that the proposed same side position limits are more than appropriate for the Trust options.

In analyzing the proposed position limit for options on the Trust, ISE also considered the supply of Ether. Specifically, ISE examined the number of market participants with a position limit of 25,000 contracts that would need to exercise in unison to put the underlying asset under stress. In the case of options on Ether, the proposed 25,000 same side position and exercise limit effectively restricts a market participant from holding positions that could be exercised in excess of 2,500,000 shares of the Trust. Utilizing data from October 22, 2024, the Trust had 57,440,000 shares outstanding, therefore 22,976 participants would have to simultaneously exercise their position limits in order to create a scenario that may put the underlying asset (shares of the Trust) under stress. The Exchange notes that historically, from observation only, it appears that no

³⁰ The Trust has one asset and therefore is not comparable to a broad based ETF where there are typically multiple components.

³¹ ISE acquired this figure as of October 22, 2024. See <https://www.ishares.com/us/products/337614/ishares-ethereum-trust-etf>. The global supply of ether grows each day ether are minted.

³² ISE determined the median market capitalization for 50,000 contracts was 788,000,000 million and the median market capitalization for 75,000 contracts was 1,037,000 billion. Further, placing the Trust at 50,000 contracts would rank it in the 59th percentile in market capitalization and placing the Trust at 75,000 contracts would rank it in the 46th percentile in market capitalization.

³³ The 4.4% was calculated as follows: $2,500,000 \text{ (exercisable stock from position limit)} / 57,440,000 \text{ (shares outstanding on October 22, 2024)} = 4.35237\%$.

³⁴ CME Ether Futures are described in Chapter 350 of CME's Rulebook.

³⁵ See CME Rulebook, Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices.

³⁶ See CME Rulebook Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices.

³⁷ *Id.*

more than five market participants holding options positions in any single security have exercised in unison in any option. As unlikely an occurrence as all market participants exercising their positions in unison would be, if it were to occur, it should be noted that even such an occurrence would not likely put the Trust under stress as economic incentives, would induce the creation of more shares through the ETF creation and redemption process.

Further, given that the current global supply of Ethereum, the underlying asset of the Trust, is 120,392,960³⁸ coins and each Ethereum coin can currently be exchanged (Ethereum to USD and then USD to Trust shares) for 131.6 shares of the Trust another 15,843,979,598 shares of the Trust could be created by the underlying ETF. In addition as of October 22, 2024, a 25,000 contract position limit for options on the Trust would represent less than 4.3524% of the outstanding shares of the Trust (2,500,000 (position limit exercise)/57,440,000 (shares outstanding of the Trust on October 22, 2024)) = 4.3524%.³⁹ Also, as of October 22, 2024, a 25,000 contract position limit for options on the Trust would represent less than .01578% of the global supply of Ether (2,500,000 (position limit exercise)/120,392,960 (number of Ether) × 131.6 (Trust shares per Ether)) = .01578%.

The Exchange represents that the same surveillance procedures applicable to all other options on other ETFs currently listed and traded on the Exchange will apply to options on the Trust. Also the Exchange represents that it has the necessary systems capacity to support the new option series. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading options on ETFs, including the proposed Trust options.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to the Trust options that it applies to the Exchange's other options products.⁴⁰ The Exchange's staff will have access to the surveillance programs conducted by

its affiliate exchanges, MIAX Pearl and MIAX Sapphire with respect to trading in the shares of the underlying Ether Trust when conducting surveillances for market abuse or manipulation in the options on the Trust. Additionally, the Exchange is a member of the Intermarket Surveillance Group ("ISG") under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining surveillance data from MIAX Pearl and MIAX Sapphire, the Exchange will be able to obtain information regarding trading in the shares of the underlying Trust from Nasdaq, ISE, Cboe and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority ("FINRA"). Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.⁴¹

The underlying shares of spot Ethereum exchange-traded products ("ETPs"), including the Trust, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot Ethereum-based ETPs,

[e]ach Exchange has a comprehensive surveillance sharing agreement with the [Chicago Mercantile Exchange ("CME")] via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME Ethereum futures market.⁴²

The Exchange states that in the Ethereum ETP Approval Order, given the consistently high correlation

⁴¹ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO ("common members"). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

⁴² See Ethereum ETP Approval Order, 89 FR at 46938.

between the CME Ethereum futures market and the spot Ethereum market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Ethereum ETPs]."⁴³

In light of surveillance measures related to both options and futures as well as the Trust,⁴⁴ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Trust. Further, the Exchange represents that it will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Trust. Additionally, the Exchange may obtain trading information via ISG from other exchanges who are members or affiliates of the ISG.

The Exchange has also analyzed its capacity and represents that it believes the Exchange and Options Price Reporting Authority or "OPRA" have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on the Trust up to the number of expirations currently permissible under the Rules. Because the proposal is limited to one class, the Exchange believes any additional traffic that may be generated from the introduction of the Trust options will be manageable.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁴⁵ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁴⁶ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to

⁴³ See Ethereum ETP Approval Order, 89 FR at 46939.

⁴⁴ See Ethereum ETP Approval Order.

⁴⁵ 15 U.S.C. 78f(b).

⁴⁶ 15 U.S.C. 78f(b)(5).

³⁸ This figure was acquired as of October 22, 2024. See <https://www.ishares.com/us/products/337614/ishares-ethereum-trust-etf>. The global supply of ether grows each day ether are minted.

³⁹ See <https://coinmarketcap.com/currencies/ethereum/>.

⁴⁰ The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (e.g., spoofing, marking the close, ping, phishing).

and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁴⁷ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that the proposal to list and trade options on the Trust will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because offering options on the Trust will provide investors with a greater opportunity to realize the benefits of utilizing options on an ETF based on spot Ethereum, including cost efficiencies and increased hedging strategies. The Exchange believes that offering options on a competitively priced ETF based on spot Ethereum will benefit investors by providing them with an additional, relatively lower-cost risk management tool, allowing them to manage, more easily, their positions and associated risks in their portfolios in connection with exposure to spot Ethereum. Today, the Exchange lists options on other commodity ETFs structured as a trust, which essentially offer the same objectives and benefits to investors, and for which the Exchange has not identified any issues with the continued listing and trading of options on those ETFs.

The Exchange also believes the proposal to permit options on the Trust will remove impediments to and perfect the mechanism of a free and open market and a national market system, because options on the Trust will comply with current Exchange Rules. Options on the Trust satisfy the initial listing standards and continued listing standards currently in the Exchange Rules applicable to options on all ETFs, including ETFs that hold other commodities already deemed appropriate for options trading on the Exchange pursuant to Exchange Rule 402(i)(4). Additionally, as demonstrated above, the Trust is characterized by a substantial number of shares that are widely held and actively traded. Further, Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (as proposed herein), and margin requirements, will govern the listing and trading of options on the Trust.

The Exchange believes the proposed position and exercise limits are designed to prevent fraudulent and manipulative acts and practices and promote just and equitable principles of trade, as they are designed to address potential manipulative schemes and adverse market impacts surrounding the use of options, such as disrupting the market in the security underlying the options. The proposed position and exercise limits for options for the Trust is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given the Trust's market capitalization, ADV, and high number of outstanding shares. The proposed position limit, and exercise limit, is consistent with the Act as it addresses concerns related to manipulation and protection of investors because, as demonstrated above, the position limit (and exercise limit) is extremely conservative and more than appropriate given the Trust is actively traded. In support of the proposed position and exercise limits for options on the Trust are 25,000 contracts, the Exchange is citing the in depth analysis ISE did in its filing. As noted above, in the ISE Ether Approval Order, ISE considered the: (1) Trust's market capitalization and ADV, and proposed position limit in relation to other securities; (2) market capitalization of the entire Ethereum market in terms of exercise risk and availability of deliverables; (3) proposed position limit by comparing it to position limits for derivative products regulated by the CFTC; and (4) supply of Ethereum. Based on the Exchange's review of these analyses and the ISE Ether Approval Order, the Exchange believes that setting position and exercise limits for options on the Trust at 25,000 contracts is more than appropriate. The proposed position and exercise limits reasonably and appropriately balance the liquidity provisioning in the market against the prevention of manipulation. The Exchange believes these proposed limits are effectively designed to prevent an individual customer or entity from establishing options positions that could be used to manipulate the market of the underlying as well as the Ethereum market.⁴⁸

The Exchange represents that it has the necessary systems capacity to support the new Trust options. As discussed above, the Exchange believes

that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading ETF options, including Trust options. The Exchange's existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs and ETPs, such as (existing) precious metal-commodity backed ETP options as well as the proposed options on the Trust. The Exchange's existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs and ETPs, such as (existing) precious metal-commodity backed ETP options as well as the proposed options on the Trust. The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of options on the Trust in all trading sessions and to deter and detect violations of Exchange rules. Specifically, the Exchange's market surveillance staff will have access to surveillances that it conducts, and that FINRA conducts on its behalf, with respect to the Trust and, as appropriate, would review activity in the underlying Fund when conducting surveillances for market abuse or manipulation in the options on the Trust. Additionally, the Exchange is a member of the ISG under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining surveillance data from MIAAX Pearl and MIAAX Sapphire, the Exchange will be able to obtain information from Nasdaq, ISE, Cboe and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with FINRA. Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.⁴⁹

⁴⁹ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO ("common members"). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such

⁴⁸ See Securities Exchange Act Release No. 39489 (December 24, 1997), 63 FR 276 (January 5, 1998) (SR-CBOE-1997-11).

⁴⁷ *Id.*

The underlying shares of spot Ethereum ETPs, including the Trust, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot Ethereum-based ETPs:

“[e]ach Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group.⁵⁰ This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME ether futures market.”⁵¹

The Exchange states that in the Ethereum ETP Approval Order, given the consistently high correlation between the CME Ethereum futures market and the spot Ethereum market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be “expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Ether ETPs].”⁵²

In light of surveillance measures related to both options and futures as well as the underlying Trust,⁵³ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Trust. Options on the Trust must satisfy the initial listing standards and continued listing standards currently in the Exchange Rules, applicable to options on all ETFs, including options on other commodity ETFs already deemed appropriate for options trading on the Exchange pursuant to Exchange Rule 402(i)(4).

Further, the Exchange represents that it will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Trust.

Finally, the Commission has previously approved the listing and trading of options on other cryptocurrency backed commodity ETFs structured as trusts.⁵⁴

members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

⁵⁴ See Securities Exchange Act Release Nos. 101698 (November 21, 2024), 89 FR 93802 (November 27, 2024) (SR-MIAX-2024-40) (Self-Regulatory Organizations; MIAX Exchange LLC; Notice of Filing and Immediate Effectiveness of a

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In this regard and as indicated above, the Exchange notes that the rule change is being proposed as a competitive response to the filing submitted by ISE.⁵⁵

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as options on the Trust will be equally available to all market participants who wish to trade such options and will trade generally in the same manner as other options. Moreover, options on the Trust will be subject to Exchange Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (including as proposed to modify herein), and margin requirements. Also, and as stated above, the Exchange already lists options on other cryptocurrency backed commodity ETFs structured as trusts.⁵⁶ Further, the Trust would need to satisfy the maintenance listing standards set forth in the Exchange Rules in the same manner as any other ETF for the Exchange to continue listing options on it.

The Exchange does not believe that the proposal to list and trade options on the Trust will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that the advent of the Trust options

Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities, Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits To Allow the Exchange To List and Trade Options on the iShares Bitcoin Trust); 101716 (November 22, 2024), 89 FR 94856 (November 29, 2024) (SR-MIAX-2024-42) (Self-Regulatory Organizations; MIAX Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities, Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits To Allow the Exchange To List and Trade Options on the Grayscale Bitcoin Trust, the Grayscale Bitcoin Mini Trust, and the Bitwise Bitcoin ETF); 101717 (November 22, 2024), 89 FR 94828 (November 29, 2024) (SR-MIAX-2024-43) (Self-Regulatory Organizations; MIAX Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities, Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits To Allow the Exchange To List and Trade Options on the Fidelity Wise Origin Bitcoin Fund (the “Fidelity Fund”) and the ARK 21Shares Bitcoin ETF (the “ARK 21 Fund”)).

⁵⁵ See *supra* note 5.

⁵⁶ See Exchange Rule 402(i)(4).

trading on the Exchange may make the Exchange a more attractive marketplace to market participants at other exchanges, such market participants are free to elect to become market participants on the Exchange. Additionally, other options exchanges are free to amend their listing rules, as applicable, to permit them to list and trade options on Trust. The Exchange notes that listing and trading Trust options on the Exchange will subject such options to transparent exchange-based rules as well as price discovery and liquidity, as opposed to alternatively trading such options in the OTC market.

The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition as it is designed to increase competition for order flow on the Exchange in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering the Trust options for trading on the Exchange will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment needs in connection with Ethereum prices and Ethereum-related products and positions on a listed options exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act⁵⁷ and Rule 19b-4(f)(6) thereunder.⁵⁸ Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section

⁵⁷ 15 U.S.C. 78s(b)(3)(A)(iii).

⁵⁸ 17 CFR 240.19b-4(f)(6).

19(b)(3)(A)(iii) of the Act⁵⁹ and subparagraph (f)(6) of Rule 19b-4 thereunder.⁶⁰

A proposed rule change filed under Rule 19b-4(f)(6)⁶¹ under the Act does not normally become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),⁶² the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing and trading of options on the iShares Ethereum Trust (the “Trust”),⁶³ The Exchange has provided information regarding the underlying Trust, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of the Trust. The proposal also establishes position and exercise limits for options on the Trust and provides information regarding the surveillance procedures that will apply to Trust options. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Trust options. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.⁶⁴

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings

to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-MIAX-2025-19 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-MIAX-2025-19. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission’s Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-MIAX-2025-19 and should be submitted on or before May 8, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶⁵

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2025-06522 Filed 4-16-25; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102823; File No. SR-ISE-2025-11]

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Rules To Allow the Exchange To List Options on the Fidelity Ethereum Fund, the Bitwise Ethereum ETF, the Grayscale Ethereum Trust, and the Grayscale Ethereum Mini Trust

April 11, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 9, 2025, Nasdaq ISE, LLC (“ISE” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a “non-controversial” proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act³ and Rule 19b-4(f)(6) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Options 4, Section 3, Criteria for Underlying Securities, to list and trade options on the (1) Fidelity Ethereum Fund (the “Fidelity Fund”); (2) Bitwise Ethereum ETF (“Bitwise Fund” or “ETHW”); (3) the Grayscale Ethereum Trust (“Grayscale Fund” or “ETHE”); (4) and Grayscale Ethereum Mini Trust (“Grayscale Mini Fund” or “ETH”).

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/ise/rulefilings>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

⁵⁹ 15 U.S.C. 78s(b)(3)(A)(iii).

⁶⁰ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission has waived the pre-filing requirement.

⁶¹ 17 CFR 240.19b-4(f)(6).

⁶² 17 CFR 240.19b-4(f)(6)(iii).

⁶³ See *supra* note 5.

⁶⁴ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule’s impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).
