Estimated Total Annual Burden Cost: \$0.

In the 60-day notice, NHTSA stated that it did not know whether manufacturers would incur additional costs, nor did it have a basis for estimating these costs. In the notice, NHTSA sought comment on whether manufacturers will incur any additional costs associated with complying with the new reporting requirements, such as investing in new IT infrastructure. In response, NHTSA received one comment from Auto Innovators, which stated that “in addition to the cost of labor associated with the handling of the crash information, there are also fiscal burdens associated with the hardware and software infrastructure to monitor and manage crash reporting.” They further stated that reporting entities have already invested significant resources into setting up internal processes for the handling of crash information, which often include IT systems that come at a financial cost. The comment, however, did not provide sufficient information for NHTSA to estimate additional annual costs to reporting entities. Until NHTSA has more information on additional costs, NHTSA continues to estimate that annual costs to respondents is \$0.
