Abstract of Information Available

Human remains representing, at least, 19 individuals have been identified. The 26 associated funerary objects are stone tools, shell beads, bone tools, and ochre. The individuals and associated funerary objects were recovered in 1967 and 1968 by Idaho State University and Boise State College during excavations on private land in Weiser, Washington County, Idaho. They were transferred to the ASI–WR in the 1980s as part of a statewide redistribution of archaeological collections and represent several distinct primary and secondary burials interred between 3000- and 6000-years BP.
