Abstract: This ICR renewal covers the recordkeeping and reporting requirements for all aspects of the TSCA Title VI implementing regulations and regulations relating to accreditation bodies (ABs) and third-party certifiers (TPCs) that wish to participate in this third-party certification program. These ABs and TPCs must submit initial applications for recognition and update those applications every three and two years respectively using the Agency's Central Data Exchange (CDX) system. In addition, ABs and TPCs must submit annual reports which relay certain information to the Agency on the TSCA Title VI certification and testing activities both ABs and TPCs have performed over the last year.

TPCs are responsible for the certification of regulated composite wood products at the mill level through the oversight of panel producers, routine quarterly testing of composite wood products, and physical inspections of the panel production facilities. Through CDX, TPCs are responsible for reporting information including various notifications and annual reports.

Panel producers are responsible for communicating routine testing documentation to their respective TPC pursuant to their responsibilities under 40 CFR 770.20 and 40 CFR 770.40. Panel producers are also responsible for providing certain records to

downstream entities and purchasers of regulated composite wood products as well as the Agency, upon request.

Importers, fabricators, distributors, and retailers are responsible for maintaining records pursuant to 40 CFR 770.30 and 40 CFR 770.40(d).

Respondents/Affected Entities: Panel producers, fabricators, distributors, retailers, TPCs, and ABs.

Respondent's obligation to respond: Mandatory (15 U.S.C. 2697).

Estimated total number of potential respondents: 990,269 firms (total).

Frequency of response: On occasion.

Estimated total burden: 84,793 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Estimated total costs: \$19,638,018 (per year), with no annualized capital or operation and maintenance costs.

Changes in the estimates: There is an overall decrease of 1,396,732 hours in the total estimated combined respondent burden that is currently approved by OMB. The decrease is due to adjustments in EPA's estimates of the burden, including revisions to the estimated burden reflecting activities that only had one-time burdens associated with the initial implementation of the rule, and revisions to the estimated number of respondents based on the actual number of participants in the TSCA Title VI program.

Director, Regulatory Support Division.
