

Information Act, you must state this plainly at the beginning of your written comments. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses and from individuals identifying themselves as representatives or officials of organizations or businesses will be made available for public inspection in their entirety.

FOR FURTHER INFORMATION CONTACT: Tom Hurshman, Bureau of Land Management Project Manager, 2465 South Townsend, Montrose, CO 81401. Mr. Hurshman may also be reached at (970) 240-5345, or by sending an electronic message to: tom_hurshman@co.blm.gov.

SUPPLEMENTARY INFORMATION: Williams has submitted an application for ROW grants across Federal lands to locate a 20-inch diameter pipeline that would be used to transport natural gas liquids from an existing facility in Opal, Wyoming, to an existing processing facility in Conway, Kansas, a length of approximately 750 miles. This proposed Overland Pass Pipeline route would traverse approximately 143.3 miles of federally-administered land in Wyoming and Colorado. In Wyoming, approximately 101.7 miles of the proposed pipeline location would cross public lands administered by three BLM Field Offices: Kemmerer, Rock Springs, and Rawlins. In addition, the proposed pipeline location crosses the following two units of the National Forest System administered by the United States Forest Service, Department of Agriculture. The proposed pipeline location includes approximately 1.2 miles of the Flaming Gorge National Recreation Area in Wyoming, and 39.7 miles of the Pawnee National Grassland north of Greeley, Colorado. No Federal lands in Kansas would be affected by this proposal.

The proposed route would generally follow the I-80 corridor through southern Wyoming, mainly along the Southern Star pipeline route. The proposed route proceeds in a southeasterly direction and enters Colorado in Weld County. From the Colorado border, the route would continue southeasterly into Kansas where it would continue eastward, paralleling the Southern Star Pipeline near Bushton, Kansas. Near Bushton, it would then parallel an existing BP Amoco pipeline to Williams' processing facilities in Mitchell and Conway, Kansas. At Conway, the transported natural gas liquids will be processed and distributed through the existing transportation infrastructure to

consumer markets in the Midwest and Texas Gulf Coast.

Through public scoping, the BLM expects to identify various issues, potential impacts and mitigation measures, and alternatives to the proposed action. At present, the BLM has identified the following issues and concerns: Impacts to threatened, endangered, and sensitive species and their habitat; adverse impacts to visual resources; potential impacts to big game and other wildlife; land use conflicts; effect of the project on local and regional socioeconomic conditions; increased potential for introduction and spread of noxious weeds; and the ability to efficiently reclaim lands disturbed by pipeline construction or location.

The BLM will analyze the proposed action and no action alternatives, as well as other possible alternatives to the proposed pipeline and access routes. Your comments concerning the pipeline project as proposed and feasible alternative locations, possible mitigation measures, and any other information relevant to proposed action are encouraged. Any persons wishing to be added to a mailing list of interested parties can call or write to BLM, as described in this notice. Additional informational meetings may be conducted throughout the process to keep the public informed of the progress of the EIS.

Robert A. Bennett,

State Director.
