

the extent a court finds this final action to be locally or regionally applicable, the Administrator is exercising the complete discretion afforded to him under the CAA to make and publish a finding that this action is based on a determination of “nationwide scope or effect” within the meaning of CAA section 307(b)(1).⁶⁶ This final action revises both the regulatory requirements in 40 CFR part 70 that govern state, local, tribal, and U.S. territorial operating permit programs nationwide and the regulatory requirements in 40 CFR part 71 that govern federal operating permits nationwide.⁶⁷ Accordingly, this final action is a nationally applicable regulation or, alternatively, the Administrator is exercising the complete discretion afforded to him by the CAA and hereby finds that this final action is based on a determination of nationwide scope or effect for purposes of CAA section 307(b)(1) and is hereby publishing that finding in the **Federal Register**.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the District of Columbia Circuit within 60 days from the date this final action is published in the **Federal Register**. Filing a petition for reconsideration by the Administrator of this final action does not affect the finality of the action for the purposes of judicial review, nor does it extend the time within which a petition for judicial review must be filed, and shall not postpone the effectiveness of such rule or action.

⁶⁶ In deciding whether to invoke the exception by making and publishing a finding that this final action is based on a determination of nationwide scope or effect, the Administrator has also taken into account a number of policy considerations, including his judgment balancing the benefit of obtaining the D.C. Circuit’s authoritative centralized review versus allowing development of the issue in other contexts and the best use of Agency resources.

⁶⁷ In the report on the 1977 Amendments that revised section 307(b)(1) of the CAA, Congress noted that the Administrator’s determination that the “nationwide scope or effect” exception applies would be appropriate for any action that has a scope or effect beyond a single judicial circuit. See H.R. Rep. No. 95–294 at 323, 324, reprinted in 1977 U.S.C.A.N. 1402–03.

Katie Davis, 323–372–2126, katie.davis@noaa.gov.

SUPPLEMENTARY INFORMATION: On April 11, 2023, NMFS published a final rule approving changes to the Pacific halibut Area 2A Catch Sharing Plan and implementing recreational (sport) management measures for the 2023 Area 2A recreational fisheries (88 FR 21503), as authorized by the Northern Pacific Halibut Act of 1982 (16 U.S.C. 773–773(k)). The Pacific Fishery Management Council (Council) 2023 Catch Sharing Plan provides a recommended framework for NMFS’ annual management measures and subarea allocations based on the 2023

Area 2A Pacific halibut catch limit of 1,520,000 pounds (lb) (689 metric tons (mt)) set by the International Pacific Halibut Commission (IPHC). The Area 2A catch limit and recreational fishery allocations were adopted by the IPHC and were published in the **Federal Register** on March 7, 2023 (88 FR 14066) after acceptance by the Secretary of State, with concurrence from the Secretary of Commerce, in accordance with 50 CFR 300.62. The Area 2A Pacific halibut management measures include recreational fishery season dates, bag limits, and subarea allocations.

Federal regulations at 50 CFR 300.63(c)(6), “Inseason Management for Recreational (Sport) Halibut Fisheries in Area 2A,” allow the NMFS Regional Administrator to modify annual regulations during the season. These inseason provisions allow the Regional Administrator to modify recreational (sport) fishing periods, bag limits, size limits, days per calendar week, and subarea allocations, if it is determined it is necessary to meet the allocation objectives and the action will not result in exceeding the catch limit.

NMFS has determined that, due to lower than expected landings in the Washington Puget Sound, North Coast, and South Coast subareas; the Columbia River subarea; and the Oregon Central Coast subarea; inseason action to modify the 2023 annual regulations for the recreational fishery is warranted at this time to provide additional opportunity for fishery participants to achieve the Area 2A subarea allocations. As stated above, inseason modification of fishing season dates is authorized by Federal regulations at 50 CFR 300.63(c)(6). After consulting with the IPHC, the Council, the Washington Department of Fish and Wildlife (WDFW), and the Oregon Department of Fish and Wildlife (ODFW), NMFS determined the following inseason actions are necessary to meet the management objective of attaining subarea allocations, will not result in exceeding any subarea allocations, and are consistent with the inseason management provisions allowing for the modification of recreational fishing periods and recreational fishing days per calendar week. Notice of these additional dates and increased bag limits will also be announced on the NMFS hotline at 206–526–6667 or 800–662–9825.

Weekly catch monitoring reports for the recreational fisheries in Washington, Oregon, and California are available on their respective state Fish and Wildlife agency websites. NMFS and the IPHC will continue to monitor recreational catch obtained via state sampling
