

C. Contingency for Failure To Achieve Rate-of-Progress by November 15, 1999 and November 15, 2002

The contingency measures plan must identify specific measures to be undertaken if the area fails to meet any applicable milestone, to make rate-of-progress, or to attain the NAAQS. With respect to the November 15, 1999, and November 15, 2002, milestones, EPA believes that the contingency plan will need to account for any adjustment to the milestone dates.

We also note that the presently-approved 1996 ROP/attainment contingency plan is automatically invoked if we take final action determining the BPA has failed to attain the standard. (See 63 FR 6659 for the contingency measures.) Therefore, the State will be required to "backfill" these contingency measures. Since the BPA area did not attain by the moderate area attainment date, and in order to fulfill the contingency measures requirements of sections 172(c)(9) and 182(c)(9) of the CAA, it is proposed that the implementation of the failure-to-attain contingency measures in the current SIP will be triggered automatically upon the effective date that this proposed rule is finalized. Further, Texas will be required to submit a revision to the SIP containing additional contingency measures for its serious, or if appropriate, severe, area SIP to meet ROP requirements and backfill for failure to attain. See 57 FR 13498, 13511 (1992).

XIII. What Are the Impacts on the Title V Program?

Upon reclassification to serious or severe, the major stationary source threshold will be lowered. Consequently, the State's Title V operating permits program regulations need to cover existing sources that will become subject to the appropriate lower major stationary source threshold. Any newly major stationary sources must submit a timely Title V permit application. "A timely application for a source applying for a part 70 permit for the first time is one that is submitted within 12 months after the source becomes subject to the permit program or on or before such earlier date as the permitting authority may establish." See 40 CFR 70.5(a)(1). The 12 month (or earlier date set by the applicable permitting authority) time period to submit a timely application will commence on the effective date of any reclassification action.

XIV. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this proposed action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This proposed action merely proposes to approve state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule proposes to approve pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4).

This proposed rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely proposes to approve a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This proposed rule also is not subject to Executive Order 13045 "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the

absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This proposed rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).
