DEPARTMENT OF DEFENSE**Corps of Engineers, Department of the Army****Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Special Area Management Plan for the Otay River Watershed, San Diego County, CA**

AGENCY: U.S. Army Corps of Engineers, (DoD).

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers (Corps of Engineers) is announcing its intent to prepare a Draft Environmental Impact Statement (DEIS) for a Special Area Management Plan (SAMP). The SAMP is being developed to address potential effects of anticipated development, infrastructure, and maintenance projects on aquatic resources in the Otay River Watershed (SAMP study area). The DEIS will assess the impacts of various land development and aquatic resource protection alternatives as set forth below and further identified during the preparation of the SAMP. It is anticipated that the DEIS will be utilized by the local agencies in lieu of an Environmental Impact Report (EIR) pursuant to the California Environmental Quality Act (CEQA).

The SAMP will provide a comprehensive plan for protecting and enhancing aquatic resources while providing for the permitting of reasonable economic development and public infrastructure, consistent with the goals and objectives of local land use plans and with the regional Multiple Species Conservation Plan (MSCP) for southwestern San Diego County developed by local governments in collaboration with the U.S. Fish and Wildlife Service and California

Department of Fish and Game. The SAMP will provide a framework for a long-term program-level permitting process for projects in the watershed subject to the Corps of Engineers' permit authority under Section 404 of the Clean Water Act (CWA). Section 404 of the CWA regulates the discharge of dredged or fill material into waters of the United States, including wetlands. The SAMP may also be utilized by other agencies in the administration of their regulatory programs, including the California Department of Fish and Game (i.e., Section 1600 *et seq.* of the Fish and Game Code) and the Regional Water Quality Control Board (i.e., Section 401 of the CWA).

In addition, the SAMP will include a comprehensive program involving conservation, restoration, and management of aquatic resources within the study area.

FOR FURTHER INFORMATION CONTACT:

Questions about the proposed action and DEIS can be answered by: Ms. Laurie Monarres, Otay River SAMP Project Manager, (858) 674–5384, laurie.a.monarres@usace.army.mil, Regulatory Division (CESPL-RG), U.S. Army Corps of Engineers, Los Angeles District, San Diego Field Office, 16885 West Bernardo Drive, Suite 300A.

SUPPLEMENTARY INFORMATION: 1.

Proposed Action: The Corps of Engineers utilizes Special Area Management Plans to assist in long-term planning for regulatory actions under Section 404 of the CWA that involve large areas, complex projects, and sensitive aquatic resources. The subject SAMP study area consists of the Otay River Watershed in southwestern San Diego County.

The SAMP will describe an approach and a set of actions to preserve, enhance, and restore aquatic resources, while allowing reasonable economic development and construction and maintenance of public infrastructure facilities within the study area. Key objectives of the SAMP for the Otay River Watershed are to: (1) Evaluate the extent and condition of existing aquatic resources; (2) develop a comprehensive reserve program for the protection, enhancement, restoration and management of aquatic resources; and (3) identify and evaluate alternative land development scenarios in the context of the aquatic resource reserve program. Based on the SAMP, the Corps of Engineers will identify potential areas and/or activities suitable for authorization using abbreviated, program-level permitting procedures under Section 404 of the CWA. Activities that may be authorized using
